

**Faculty of Commerce & Management**

**Savitribai Phule Pune  
University, Pune**

**Syllabus for  
First year of  
Bachelor of Computer  
Applications (BCA)  
(2024 Pattern)**

**(with effect from A. Y. 2024-25 )**

## Program Outcomes (POs)

### Graduates will be able to:

- 1. Scientific Knowledge:** Apply the knowledge of mathematics, science fundamentals, and specialization to the solution of complex problems.
- 2. Problem analysis:** Identify, formulate, review research literature, and analyze complex problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and sciences.
- 3. Design/development of solutions:** Design solutions for complex problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern IT tools including prediction and modelling to complex activities with an understanding of the limitations.
- 6. The Graduate and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional practice.
- 7. Environment and sustainability:** Understand the impact of the professional solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the professional practice.
- 9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- 10. Communication:** Communicate effectively on complex activities with the professional community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. Project management and finance:** Demonstrate knowledge and understanding of the science and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

# Table of Contents

<b>Sr. No.</b>	<b>Description</b>	<b>Page Number</b>
1.	Structure of a. 3 years BCA with Multidisciplinary Minor, b. 4 years BCA Hon. with Research and Multidisciplinary Minor, c. 4 years BCA Hon. and Multidisciplinary Minor and d. 4 years BCA with Double Minor Degrees	5 - 16
2.	Course Drafts for Courses at SEM I	17 – 28
3.	Course Drafts for Courses at SEM II	29 – 41
4.	List of Open Electives and Minors Courses Offered By BOS in Computer Applications for other disciplines of Faculty of Science and Technology and/or other faculties	42
5.	Detailed drafts of Open Elective Courses (For SEM I & II only)	43 – 47

**Exit option: Award of UG Certification in Bachelor of Computer Application (BCA) with 44 credits and an additional 08 credits (for either courses by Microsoft/CCNA/Salesforce/Google/AWS/Oracle/ RedHat etc or Swayam/ NPTEL/MKCL equivalent to core NSQF course or an Internship) or else Continue with Major and Minor**

# SYLLABUS SEMESTER I

**Savitribai Phule Pune University**  
**First Year of B. Sc. (Computer Applications) - (2024 Course)**  
**CA – 101 – T : Problem Solving and Programming in C**

<b>Teaching Scheme:</b> <b>Theory: 02 Hrs/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To provide a broad overview of problem solving techniques
- To learn C programming to solve problems

**Course Outcomes:** At the end of the course, students will be able to

- Define algorithms and explain their characteristics
- Formulate algorithm and draw flow chart to solve a given problem
- Explain use of appropriate data types, control statements
- Demonstrate ability to use top-down program design

**Course Contents**

<b>Unit I</b>	<b>Problem solving, algorithms and flowcharts</b>	<b>06 Hrs</b>
<p>Types of Problems, Problem solving using computer, Difficulties with problem solving, Problem solving aspects.</p> <p>Definition &amp; Characteristics of algorithm, Examples of algorithms, Flow charts with examples, Top-down design</p> <p>Problem solving using Arithmetic Statements, Conditional Statement &amp; Iterative Statements such as Addition/Multiplication, check number is positive/negative, Maximum of 2 numbers &amp; 3 numbers, sum of first n numbers, sum of given n numbers, reverse digits of a number, check whether the number is palindrome, check number is prime, factorial of number, factors of number, GCD, LCM of numbers etc.</p>		
<b>Unit II</b>	<b>C Fundamentals</b>	<b>07 Hrs</b>
<p>Introduction to C, Features of C, Structure of C Program, C Character Set, Identifiers and Keywords, Variables and constants</p> <p>Data types- Basic data types, Enumerated types, Type casting, Declarations, Expressions, Operators and Expressions Unary and Binary arithmetic operators, Increment Decrement operators, Relational and logical operators, Bit wise operators, Assignment operators, Comma operator, size of operator, Ternary conditional operator, Precedence and associativity</p> <p>Input Output Statements: printf, scanf functions, getchar, putchar, getch functions, gets, puts functions, Escape sequence characters, Format specifiers</p>		
<b>Unit III</b>	<b>Control &amp; Iterative Structures</b>	<b>05 Hrs</b>
<p>If, If- Else Statements, Nested If Statements, Conditional Branching – switch statement, Loop (while, do...while, for), break, continue, goto statements</p>		
<b>Unit IV</b>	<b>Functions</b>	<b>06 Hrs</b>
<p>Introduction to Functions, Function Arguments, Library &amp; User defined functions, Methods for parameter passing, Recursion, Storage Classes – Auto, Static, Global and Register</p>		
<b>Unit V</b>	<b>Arrays</b>	<b>06 Hrs</b>

Introduction, Array Declarations, Bounds Checking, Single dimension Arrays, Two dimension Arrays, Arrays & Function

**Reference Books:**

**Savitribai Phule Pune University**  
**First Year of B. Sc. (Computer Applications) - (2024 Course)**  
**CA – 102 – P : Lab Course on CA – 101 - T**

<b>Teaching Scheme:</b> <b>Practical: 04 Hrs/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester :35 Marks</b>
--	-----------------------------	---

**Course Objectives:**

- To learn formulation of algorithm for a given problem
- To study various data types, arrays and functions in C
- To understand input-output and, control and iterative statements in C

**Course Outcomes:** On completion of the course, students will be able to–

- Formulate an algorithm and draw flowchart for the given problem
- Implement the given algorithm in C
- Write programs using appropriate data types and control structures in C

**Guidelines for Instructor's Manual**

The instructor shall frame at least 14 assignments. Instructor's manual consisting of University syllabus, conduction & Assessment guidelines is to be developed.

**Guidelines for Student Journal**

The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up for each assignment. Write-up shall include Title, Problem Statement, software and Hardware requirements, Date of Completion.

Program codes with sample output of all performed assignments are to be submitted as softcopy. Use of DVD containing students programs maintained by lab In-charge is highly encouraged. For reference one or two journals may be retained with program prints.

**Guidelines for Assessment**

Continuous assessment of laboratory work is to be carried out based on overall performance of students. For each lab assignment, the instructor will assign grade/marks based on parameters such as timely completion, understanding, neatness etc. with appropriate

Sr. No.	Assignment List
1	Assignment on use of data types, simple operators (expressions)
2	Assignment on decision making statements (if and if-else, nested structures)
3	Assignment on decision making statements (switch case)
4	Assignment on use of while loops
5	Assignment on use of for loops
6	Assignment on nested loops
7	Assignment on exit, goto, continue, break
8	Assignment on menu driven programs.
9	Assignment on writing C programs in modular way (use of user defined functions)
10	Assignment on call by value
11	Assignment on call by reference
12	Assignment on recursive functions
13	Assignment on use of arrays (1-D array) and functions
14	Assignment on use of multidimensional array (2-D arrays) and functions
15	Assignment on Standard Library Function

**Savitribai Phule Pune University**  
**First Year of B. Sc. (Computer Applications) - (2024 Course)**  
**CA – 103 – T : Computer Organization and Architecture**

<b>Teaching Scheme:</b> <b>Theory: 02 Hrs/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 30 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To study number system, logic gates
- To understand combinational and sequential circuits
- To provide a broad overview of architecture and functioning of computer systems
- To learn the basic concepts behind the architecture and organization of computers.

**Course Outcomes:** On completion of the course, student will be able to–

- Design of combinational circuits
- Design of sequential circuits
- Describe block diagram of CPU, Memory and types of I/O transfers

**Course Contents**

<b>Unit I</b>	<b>Data representation and Computer Arithmetic</b>	<b>04 Hrs</b>
Review of Decimal, Binary, Octal, Hexadecimal Number systems and their inter-conversion, BCD code, Gray code, Excess-3 code, ASCII , EBCDIC, Unicode, Signed and Unsigned numbers, 1's and 2's complements, Binary arithmetic.		
<b>Unit II</b>	<b>Boolean Algebra &amp; Logic Gates</b>	<b>07 Hrs</b>
Boolean theorems, Boolean Laws, De Morgan's Theorem, Reduction of Logic expression using Boolean Algebra, Introduction to Logic (AND, OR, NOT), Classification of Logic gates, Universal Logic gates, Implementation of other gates using universal gates. Basic concepts of Karnaugh map, minterm and maxterm.		
<b>Unit III</b>	<b>Combinational Circuits</b>	<b>07 Hrs</b>
Definition of combinational circuits, Detail study of Half adder, Full adder, Half subtractor, Full subtractor, Multiplexer(4:1) & Demultiplexer(1:4), Encoder (8-line-to-3-line) and Decoder (3-line-to-8-line), Parity generator and checker, Block diagram of ALU.		
<b>Unit IV</b>	<b>Sequential circuits</b>	<b>07 Hrs</b>
Definition of sequential circuits, Detail study of Flip Flops and truth tables: S-R FF, J-K FF, T and D type FFs, Flip flop as memory device.  Counters: Asynchronous-Mod16, Mod-10, Mod-8, up down counter, Synchronous-Ring counter, Event counter.  Shift Registers and their types, serial to parallel and parallel to serial converters using shift registers.		
<b>Unit V</b>	<b>CPU, Memory and I/O Organization</b>	<b>05 Hrs</b>

Block diagram of CPU, functions of CPU, general register organization, flags, Concept of RISC and CISC

Memory System hierarchy, Cache Memory, Internal Memory, External Memory, Concept of Virtual Memory.

Basics of I/O organisation: types of I/O data transfers.

<b>Savitribai Phule Pune University</b> <b>First Year of Bachelor of Computer Applications (2024 Course)</b> <b>CA-104-P: Lab Course on CA-103-T</b>		
<b>Teaching Scheme:</b> <b>Practical: 04 Hours/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
<b>Course Objectives:</b> <ul style="list-style-type: none"> <li>• To study number system, logic gates</li> <li>• To understand combinational and sequential circuits</li> <li>• To provide a broad overview of architecture and functioning of computer systems</li> <li>• To learn the basic concepts behind the architecture and organization of computers.</li> </ul>		
<b>Course Outcomes:</b> On completion of the course, student will be able to– <ul style="list-style-type: none"> <li>• Design of combinational circuits</li> <li>• Design of sequential circuits</li> <li>• Describe block diagram of CPU, Memory and types of I/O transfers</li> </ul>		
<b>Guidelines for Instructor's Manual</b>		
The instructor shall frame at least 12 assignments. Instructor's manual consisting of University syllabus, conduction & Assessment guidelines is to be developed.		
<b>Guidelines for Student Journal</b>		
The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up for each assignment. Write-up shall include Title, Problem Statement, Date of Completion etc. For reference one or two journals may be retained.		
<b>Guidelines for Assessment</b>		
Continuous assessment of laboratory work is to be carried out based on overall performance of students. For each lab assignment, the instructor will assign grade/marks based on parameters such as timely completion, understanding, neatness etc. with appropriate weightage		
<b>List of Assignments</b>		
<ol style="list-style-type: none"> <li>1. To Study and verify the Truth Tables of Logic Gates.</li> <li>2. To Study De-morgan's theorems.</li> <li>3. Code Converters using K-Map.</li> <li>4. Half Adder and Full Adder.</li> <li>5. Decimal to BCD Encoder</li> <li>6. Multiplexer (2:1) and De-multiplexers (1:2)</li> <li>7. Flip-flops (SR, D and JK-FF)</li> <li>8. 4-bit binary asynchronous counter using IC 7493.</li> <li>9. Shift Registers.</li> <li>10. Study of 4-bit ALU (IC 74181)</li> <li>11. Study of 3-bit Synchronous Up-Down counter.</li> <li>12. Parity generator and checker</li> </ol>		

**Savitribai Phule Pune University**  
**First Year of B. Sc. (Computer Applications) - (2024 Course)**  
**CA – 105 – T : Discrete Mathematics and Statistics**

<b>Teaching Scheme:</b> Theory: 02 Hrs/Week	<b>Credits</b> 02	<b>Examination Scheme:</b> Continuous Evaluation: 15 Marks End-Semester : 30
--	----------------------	--

**Course Objectives:**

- Learn basic terminology formal logic, proofs, sets, relations, functions and perform the operations associated with same
- Use formal logic proof and logical reasoning to solve problems
- To understand significance of statistical measures
- To study Correlation and Probability

**Course Outcomes:** On completion of the course, students will be able to–

- Relate and apply techniques for constructing mathematical proofs and make use of appropriate set operations, propositional logic to solve problems
- Use function or relation models to interpret associated relationships
- Apply basic counting techniques and use principles of probability
- Given a data, compute various statistical measures of central tendency
- Use appropriate Sampling techniques

**Course Contents**

<b>Unit I</b>	<b>Set Theory and Logic</b>	<b>06 Hrs</b>
<p><b>Sets</b>– Set Theory, Need for Sets, Representation of Sets, Set Operations, cardinality of set, <b>Types of Sets</b> – Bounded and Unbounded Sets, Countable and Uncountable Sets, Finite and Infinite Sets, Countably Infinite and Uncountably Infinite Sets, power set, <b>Propositional Logic</b>- logic, Propositional Equivalences, Application of Propositional Logic-Translating English Sentences, Proof by Mathematical Induction and Strong Mathematical Induction.</p>		
<b>Unit II</b>	<b>Relations and Functions</b>	<b>06 Hrs</b>
<p><b>Relations:</b> Properties, n-ary Relations and Applications, Representing Relations , Closures of Relations, Equivalence Relations, Partial Orderings, partitions, Hasse Diagram, Lattices, Chains and Anti-Chains, Transitive Closure and Warshall's Algorithm</p> <p><b>Functions-</b> Surjective, Injective and Bijective functions, Inverse Functions and Compositions of Functions.</p>		
<b>Unit III</b>	<b>Counting and Probability</b>	<b>06 Hrs</b>
<p>The Basics of Counting, rule of Sum and Product, Permutations and Combinations, Binomial Coefficients and Identities, Generalized Permutations and Combinations, The Pigeonhole Principle.</p> <p>Probability: Basic Concepts, Definition, Addition and Multiplication Theorems, Conditional probability and Bayes' Theorem</p>		
<b>Unit IV</b>	<b>Data Presentation and Aggregation</b>	<b>06 Hrs</b>

**Data Types:** attribute, variable, discrete and continuous variable, **Data presentation:** frequency distribution, histogram, ogive, box-plot, bar plots

**Measures of Central Tendency:** Arithmetic Mean (AM), Weighted Arithmetic Mean, Arithmetic Mean Computed from Grouped Data, Concept of Median, Mode, Geometric Mean (GM), Harmonic Mean (HM), Quartiles, Deciles, and Percentiles

**Measures of Dispersion:** Standard Deviation, Root Mean Square, Variance, Absolute and Relative Dispersion

<b>Unit V</b>	<b>Correlation Theory and Sampling</b>	<b>06 Hrs</b>
---------------	--	---------------

**Correlation:** Bivariate data, scatter plots, Linear Correlation, Correlation of Attributes, Coefficient of correlation

**Regression:** Concept, Linear Regression, Prediction

**Elementary Sampling Theory :** Sampling Theory, Random Samples, Sampling With and Without Replacement, Stratified Sampling

<b>Guidelines for Assessment</b>		
Continuous assessment of laboratory work is to be carried out based on overall performance of students. For each lab assignment, the instructor will assign grade/marks based on parameters such as timely completion, understanding, neatness etc. with appropriate weightage.		
<b>List of Assignments</b>		
Assignment 01: Using basic HTML elements (headings, paragraphs, line break, colour, fonts, links, Images, etc)		
Assignment 02: Creating Lists using HTML Tags		
Assignment 03: Creating Tables using HTML Tags		
Assignment 04: Creating Frames in HTML		
Assignment 05: Creating Forms using HTML		
Assignment 06: Designing of HTML screens using CSS		
Assignment 07: Using Functions in JavaScript		
Assignment 08: Carryout Validation using JavaScript		
Assignment 09: Using Event Handling.		

Assignment 10: Designing website using basic elements of HTML, CSS and JavaScript.

Assignment 11: Designing website using HTML, CSS and advanced JavaScript elements and event handling

# SYLLABUS SEMESTER II

**Savitribai Phule Pune University**  
**First Year of B. Sc. Computer Applications (2024 Course)**  
**CA – 151 - T: Advanced C Programming**

<b>Teaching Scheme:</b> Theory: 02 Hrs/Week	<b>Credits</b> 02	<b>Examination Scheme:</b> Continuous Evaluation: 15 Marks End-Semester : 35 Marks
--	----------------------	--

**Course Objectives:**

- To learn advanced features in C Programming
- To study advanced data types
- To understand built-in library functions

**Course Outcomes:** On completion of the course, student will be able to–

- Write programs using pointers and structures
- Use Pre-processor directives
- Manipulate strings using library functions
- Write programs to perform operations on Files

**Course Contents**

Unit I	Preprocessor	06 Hrs
Concept, Format of preprocessor directives, File inclusion directives (#include), Macro substitution directives (#define), nested macros, parameterized macros, Macros versus functions, #error / #pragma directives, Conditional compilation (#if/#ifdef/#else/#elif/#endif), Predefined macros (_DATE_ / _TIME_ / _FILE_ / _LINE_ / _STDC_ )		
Unit II	Pointers	07 Hrs
Concept – reference & dereference, Declaration, definition, initialization & use, Types of pointers, Pointer Arithmetic, Multiple indirection, parameter passing – call by value and call by reference Arrays & Pointers - Pointer to array, Array of pointers, Functions & pointers - Passing pointer to function, Returning pointer from function, Function pointer, Pointers & const Dynamic memory management, Allocation, Resizing, Releasing, Memory leak / dangling pointers		
Unit III	Strings	05 Hrs
Concept, Declaration, definition, initialization, format specifiers, String literals/ constants & variables – reading & writing from & to console, Importance of terminating NULL character, Strings & pointers Array of strings & array of character pointers, User defined functions, predefined functions in string.h - strlen , strcpy , strcat , strcmp , strcmpi , strrev , strlwr ,strupr , strset , strchr , strrchr , strstr , strncpy , strncat , strncmp , strncmpi , strnset , strtok, Command line arguments – argc and argv		
Unit IV	Structures	06 Hrs

Concept, Declaration, definition, initialization, accessing structure members ( . operator), Array of structures, Pointers to structures, Declaring pointer to structure  
Accessing structure members via pointer to structure, Structures & functions,  
Passing each member of structure as a separate argument, Passing structure by value / address  
Nested structures, typedef & structures, Concept of Union

**Unit V**

**File Handling**

**06 Hrs**

Concept of streams, need, Types of files, Operations on text & binary files, Random access file, library functions for file handling – fopen, fclose, fgetc, fseek, fgets, fputc etc

**Reference Books:**

1. The C Programming Language (Second Edition) – By B. W. Kerninghan & D. M. Ritchie
2. Programming in C – A Practical Approach – By Ajay Mittal (Pearson Publications)
3. Programming with C – By Byron S Gottfried (Schaum's Outlines)
4. A structural Programming Approach using C – By Behrouz Forouzan & Richard Gilberg
5. Y S Kanetkar, "Let Us C", BPB Publications

**Savitribai Phule Pune University**  
**First Year of B. Sc. (Computer Applications) (2024 Course)**  
**CA – 152 – P : Lab Course on CA – 151 - T**

<b>Teaching Scheme:</b> <b>Practical: 04 Hrs/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester :35</b>
--	-----------------------------	---

**Course Objectives:**

- To learn advanced features in C Programming
- To study advanced data types
- To understand built-in library functions

**Course Outcomes:** On completion of the course, student will be able to–

- Write programs using pointers and structures
- Use Pre-processor directives
- Manipulate strings using library functions
- Write programs to perform operations on Files

**Guidelines for Instructor's Manual**

The instructor shall frame at least 12 assignments. Instructor's manual consisting of University syllabus, conduction & Assessment guidelines is to be developed.

**Guidelines for Student Journal**

The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up for each assignment. Write-up shall include Title, Problem Statement, software and Hardware requirements, Date of Completion.

Program codes with sample output of all performed assignments are to be submitted as softcopy. Use of DVD containing students programs maintained by lab In-charge is highly encouraged. For reference one or two journals may be maintained with program prints.

**Guidelines for Assessment**

Continuous assessment of laboratory work is to be carried out based on overall performance of students. For each lab assignment, the instructor will assign grade/marks based on parameters such as timely completion, understanding, neatness etc. with appropriate weightage.

<b>Sr. No.</b>	<b>Assignment</b>
1	To demonstrate use of preprocessor directives
2	To demonstrate use of pointers
3	To demonstrate advanced use of pointers
4	To demonstrate concept of strings, array of strings
5	To demonstrate string operations using pointers
6	To demonstrate command line arguments
7	To demonstrate structures (using array and functions )
8	To demonstrate nested structures
9	To demonstrate use of bitwise operators.
10	To demonstrate file handling

**First Year of B. Sc. (Computer Applications) - (2024 Course)**  
**CA – 153 – T : Introduction to Microcontrollers**

<b>Teaching Scheme:</b> Theory: 02 Hrs/Week	<b>Credits</b> 02	<b>Examination Scheme:</b> Continuous Evaluation: 15 Marks End-Semester : 30 Marks
--	----------------------	--

**Course Objectives:**

- To study the basics of microcontroller.
- To learn 8051 Programming.
- To understand interfacing techniques of 8051 microcontroller.
- To learn to design simple applications using 8051 microcontroller.

**Course Outcomes:** On completion of the course, student will be able to–

- Write programs using instruction set of 8051 microcontroller.
- Interface I/O peripherals to 8051 microcontroller.
- Design simple microcontroller-based applications.

**Course Contents**

Unit I	Introduction	04 Hrs
Introduction of microcontroller and microprocessor, difference between microcontroller and microprocessor, classification of microcontrollers, Applications of microcontrollers.		
Unit II	8051 microcontroller	04 Hrs
Features of 8051 microcontrollers, block diagram & Architecture of 8051, Internal Memory organization, SFRS, PSW register, pin functions of 8051, Structure of I/O ports and its Operation, External Memory Interface.		
Unit III	8051: Programmer's Model	09 Hrs
Introduction to Assembly programming, Compilers. Assemblers, Instruction classification, Instruction set, Addressing Modes: Immediate, register, direct, indirect and relative, assembler directives (ORG, END), features with examples. Introduction to 8051 programming in C.		
Unit IV	Timers and Counters	07 Hrs
Timer / counter: TMOD, TCON, SCON, SBUF, PCON Registers, Timer modes, programming for time delay using mode 1 and mode 2.		
Unit V	Interrupts and Interfacing	06 Hrs
Interrupts: Introduction to interrupt, Interrupt types and their vector addresses, Interrupt enable register and interrupt priority register (IE, IP). Basics of Interfacing: ADC, DAC, LCD, stepper motor.		
<b>Reference Books:</b>		

1. 8051 microcontroller and Embedded system using assembly and C : Mazidi and McKinley, Pearson publications.
2. The 8051 microcontroller – Architecture, programming and applications: K.Uma Rao and Andhe Pallavi, Pearson publications.

**CA – 155 – T : Linear Algebra**

<b>Teaching Scheme:</b> <b>Theory: 02 Hrs/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 30</b>
---	-----------------------------	--

**Course Objectives:**

- To offer the learner the relevant Linear Algebra concepts through Computer Science applications.
- To interpret existence and analyse the solution set of a system of linear equations.
- To formulate, solve, apply, and interpret properties of linear systems.
- To learn about the concept of linear independence of vectors and the dimension of a vector space.
- To interpret basic concepts of linear transformations, dimension, matrix representation of a linear transformation.

**Course Outcomes:** On completion of the course, students will be able to–

- Appreciate the relevance and applications of Linear Algebra in the field of Computer Science.
- Instill a computational thinking while learning linear algebra.
- Express clear understanding of the concept of a solution to a system of equations.
- Find eigenvalues and corresponding eigenvectors for a square matrix.
- Represent linear transformations using matrices.

**Course Contents**

<b>Unit I</b>	<b>Systems of Linear Equations and Matrices</b>	<b>06 Hrs</b>
1.1 Row echelon form of a matrix, reduced row echelon form of a matrix. 1.2 Definition of rank of a matrix using row echelon or row reduced echelon form. 1.3 System of linear equations- Introduction, matrix form of linear system, definition of row equivalent matrices. 1.4 Consistency of homogeneous and non-homogeneous system of linear equations using rank, condition for consistency 1.5 Solution of System of Equations: Gauss elimination and Gauss-Jordan elimination method, examples.		
<b>Unit II</b>	<b>Vector Spaces - I</b>	<b>06 Hrs</b>
2.1 Definition and examples 2.2 Subspaces 2.3 Linear Dependence and Independence (Statement and examples only) 2.4 Basis of vector space		
<b>Unit III</b>	<b>Vector Spaces - II</b>	<b>06 Hrs</b>
3.1 Dimension of a vector space 3.2 Row Space, Column Space, and Null Space of a matrix 3.3 Definition: Rank and Nullity		
<b>Unit IV</b>	<b>Eigen values and Eigen vectors</b>	<b>06 Hrs</b>
4.1 Eigen values 4.2 Eigen vectors 4.3 Diagonalization		

Unit V	Linear Transformations	06 Hrs
5.1 Definition and Examples, Properties, Equality 5.2 Kernel and range of a linear Transformation 5.3 Rank-Nullity theorem (Statement only) 5.4 Matrix representation of Linear Transformation

<p align="center"><b>Topics for Lab Assignments</b></p>		
Unit No	Topics	Number of Assignments
Unit I	Word processing and Google DOCs	04 Nos
Create, Save, Open and Edit Documents, Text Alignments, Enhancements, and Effects Basic Document Formatting and Editing, Additional Document Formatting and Editing Work with Multiple-Page Documents and Multiple Documents, Work with Columns and Tables Work with Objects, Lines, and Text Boxes, Drawing Tools, Add Special Effects Create and manipulate Google DOC using various features		
Unit II	Spreadsheets and Google Sheets	04 Nos
Create, Save, and Print a Worksheet, Use Formulas; Copy a Formula; Format and Enhance Use Functions, Additional Formatting, and Editing, Create and Edit Charts, Integrate Worksheets with Other Applications Create and manipulate Google Sheets using various features		

<b>Unit III</b>	<b>Presentations and Google Slides</b>	<b>02 Nos</b>
Create, Save, and Print a Presentation, Enhance Slides; Work with Text and Objects, Work with Slide Shows; Integrate Presentations with Other Applications Create and manipulate Google Slides using various features		
<b>Unit IV</b>	<b>Google Forms, Drives and Calendar</b>	<b>03 Nos</b>
Create, Save, Open and Edit Google form using essential features Google Drive: Create folders and subfolders, upload documents, share drive files and folders, Google Calendar: essential features		
<b>Unit V</b>	<b>Emails, Groups and Generative AI Tools</b>	<b>04 Nos</b>
Create and send, receive emails, email folders and fields, attach documents, address book, email signatures and other essential settings, Email etiquettes Create, join email groups, send and receive emails on groups Using Generative AI tools such as ChatGPT

other disciplines/ faculties  
for  
SEMESTER I and II only

<b>Savitribai Phule Pune University</b> <b>Open Elective offered by BOS in Computer Applications for UG Programs</b> <b>from Faculties other than Faculty of Science &amp; Technology for SEM I ONLY</b> <b>OE-101-CA: Introduction to Data Science (2024 Pattern)</b>		
<b>Teaching Scheme:</b> Theory:02 Hrs/Week	<b>Credits</b> 02	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
<b>Course Objectives:</b> <ul style="list-style-type: none"> <li>• To understand need of Data Science</li> <li>• To Know role of Statistics in Data Science</li> <li>• To know Data Science Models and Tasks</li> </ul>		
<b>Course Outcomes:</b> At the end of the course, students will be able to <ul style="list-style-type: none"> <li>• Define Data Science Tasks and Models and Lifecycle</li> <li>• Apply Prep-processing and visualization Techniques</li> </ul>		
<b>Course Contents</b>		
<b>Unit I</b>	<b>Introduction</b>	<b>06 Hrs</b>
What and why Why learn Data Science?, Types of Data -structured, semi-structured, unstructured Data Applications of Data Science, The Data Science Lifecycle, Role of Data Scientists Data sources-Open Data, Social Media Data, Multimodal Data, standard datasets		
<b>Unit II</b>	<b>Statistics for Data Science</b>	<b>06 Hrs</b>
Data Objects and Attributes, Attribute Types: Nominal, Binary, Ordinal Attributes, Numeric Attributes, Discrete versus Continuous Attributes, Role of statistics in Data Science Descriptive statistics - Measuring the Frequency, Measuring the Central Tendency: Mean, Median, and Mode, Measuring the Dispersion: Range, Standard deviation, Variance, Inter quartile Range		
<b>Unit III</b>	<b>Data science Models and Tasks</b>	<b>06 Hrs</b>
Predictive and Descriptive Models, Introduction to Data Science Tasks – Classification, Prediction, Association, Clustering, Performing simple Data Science Tasks using WEKA / R		
<b>Unit IV</b>	<b>Data Quality and Pre-processing</b>	<b>06 Hrs</b>
Data Quality: Why Preprocess the Data?, Data munging/wrangling operations Data Cleaning - Missing Values, Noisy Data Data Transformation – Rescaling, Normalizing, Data reduction and Data discretization		
<b>Unit V</b>	<b>Data Visualization</b>	<b>06 Hrs</b>
Introduction to Exploratory Data Analysis (EDA), Data visualization, Basic data visualization tools –Box Plots, Histograms, Bar charts/graphs, Scatter plots, Line charts, Area plots, Pie charts		
<b>Reference Books:</b> <ol style="list-style-type: none"> <li>1. Data Science Fundamentals and Practical Approaches, Gypsy Nandi, Rupam Sharma, BPB Publications, 2020.</li> </ol>

<b>Course Objectives:</b> <ul style="list-style-type: none"> <li>• To know spreadsheet concepts</li> <li>• To learn functions and formulas.</li> <li>• To understand charts and graphics.</li> <li>• To be familiar with filters and sorting of table data.</li> </ul>		
<b>Course Outcomes:</b> After successful completion of this course, learner will be able to <ul style="list-style-type: none"> <li>• Perform computations on data using formulas.</li> <li>• Present the data in graphical form.</li> <li>• Analyze data by applying various functions and filters</li> </ul>		
<b>Guidelines for Instructor's Manual</b>		
The instructor shall frame at least 14 assignments. Instructor's manual consisting of University syllabus, conduction & Assessment guidelines is to be developed.		
<b>Guidelines for Student Journal</b>		
The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up for each assignment. Write-up shall include Title, Problem Statement, software and Hardware requirements, Date of Completion. Program codes with sample output of all performed assignments are to be submitted as softcopy. Use of DVD containing students programs maintained by lab In-charge is highly encouraged. For reference one or two journals may be maintained with program prints.		
<b>Guidelines for Assessment</b>		
Continuous assessment of laboratory work is to be carried out based on overall performance of students. For each lab assignment, the instructor will assign grade/marks based on parameters such as timely completion, understanding, neatness etc. with appropriate weightage.		
<b>List of Assignments</b>		
Assignment 1: To explore interface and basic features of Excel. Make a Start with Excel from simple to complex spreadsheet. Creating templates in Excel.		
Assignment 2: Using Autocomplete and formatting features. Data entry in Excel with different data types and formatting. Formatting Cells with Number formats, Font formats, Alignment, Borders, etc.		
Assignment 3: Printing Workbooks - Setting Up Print Area, Print Titles –Repeat Rows / Columns, Designing the structure of a template, Customizing Headers & Footers.		
Assignment 4: Filtering and Sorting - Filtering on Text, Numbers & Colours, Sorting Options, Sorting and Filtering Lists.		
Assignment 5: Calculations in MS-Excel using Basic Functions (Sum, Average, Max, Min, Count, etc). Use of Text Functions (Upper, Lower, Proper, Left, Mid, Right , Trim, Len, Exact, Concatenate, Find, Substitute). Use of Arithmetic Functions (SumIf, SumIfs, CountIf, Countifs ,Averagelf, Averagelfs).		

Assignment 6: What-If Analysis - Goal Seek, Data Tables, Solver Tool, Scenario Analysis.
Assignment 7: Data Validation- Number, Date & Time Validation, Dynamic Dropdown List Creation using Data Validation – Dependency List, Custom validations based on a formula for a cell, Text and List Validation.
Assignment 8: Generating different types of charts. Using SLICERS, Filter data with Slicers, Various Charts i.e. Bar Charts / Pie Charts / Line Charts, Manage Primary and Secondary Axis.
Assignment 9: Use of conditional functions. Applying IF functions. Conditional formatting in MS-Excel. Use of OFFSET function.
Assignment 10: Recording macros and buttons. Protecting Excel- Excel Security (File Level Protection Workbook, Worksheet Protection).
Assignment 11: Excel Dashboard, Planning a Dashboard, Adding Dynamic Contents to Dashboard, Adding Tables and Charts to Dashboard.
Assignment 12: Use of Lookup functions. (Vlookup / HLookup), Creating Smooth User Interface Using Lookup, Reverse Lookup using Choose Function.
Assignment 13: Creating Simple Pivot Tables, Classic Pivot table, Basic and Advanced Value Field Setting, Calculated Field & Calculated Items, Grouping based on numbers and Dates.
Assignment 14: Arrays Functions - What are the Array Formulas, Use of the Array Formulas? Array with if, len, and mid functions formulas, Basic Examples of Arrays (Advanced Use of formulas with Array, Array with Lookup functions).
<p><b>Reference Books</b></p> <ol style="list-style-type: none"> <li>1. Beginning Excel 2019, Authors: Noreen Brown, Barbara Lave, Julie Romey, Open Oregon Educational Resources</li> <li>2. ## **I. Preamble :**

Dear Students, teachers and all stakeholders

The field of computing is rapidly expanding and changing, especially, since the last decade with continuous emergence of new disruptive technologies such as artificial intelligence, data science, cyber security, Internet of things, robotics and so on.

21<sup>st</sup> Century has witnessed rapid technological developments in every sector including the field of Computing. Moreover, it has created new job roles and massive job opportunities for budding graduates. Premium Institutes, public and private Universities, autonomous and affiliated colleges in India have always played a crucial role in producing human resources with required skill sets by capturing and monitoring these developments and offered various UG and PG programmes.

The Savitribai Phule Pune University, Pune has made its significant contribution by offering degree programmes as per the trends from time to time. In the year 1989, it started offering a degree programme Bachelor of Computer Science (BCS), now called B. Sc. (Computer Science) and was its unique offering in the state of Maharashtra. Later the University offered undergraduate and graduate programmes such as Master of Computer Management (MCM), B. Sc. (Computer Applications) and Bachelor of Computer Applications (BCA), Master of Computer Applications (MCA), M. Sc (Computer Science), M. Sc. (Computer Applications) etc.

The Savitribai Phule Pune University, Pune has taken a leading role in design and implementation of Programmes as per the guidelines and recommendations of National Education Policy (NEP) 2020. The university decided to offer UG and PG programmes with features recommended by NEP-2020 such as Multiple-entry/exit, inter and multi-disciplinary education, focus on skilling, on-job training/field projects, research, incorporation of Indian Knowledge System etc. for the holistic development of students.

The university has adopted the guidelines provided by the state Sukanu Samittee and prepared the credit structure for this UG programmes. The detailed draft for FY BCA was implemented from June 2024. This document provides detailed draft for SY BCA which will be implemented from June 2025.

The Ad-hoc Board of Studies in Computer Applications has prepared a structure for BCA with following features

- The structure of the course is designed as per National Education Policy (NEP) 2020 and is in line with university guidelines.
- The total credits offered for the three years with six semesters are 132 credits with 22 credits assigned for each of the six semesters. Candidate has an option to continue with fourth year either for Hon. with research or Hon. degree, each with 176 credits
- The programme has Multiple Entry/exit feature: A candidate may exit the programme after first, second, third or fourth year and shall be awarded with UG Certification, UG Diploma, Degree and Hon. Degree with Research / Hon. Degree respectively
- Various types of courses include – Major Core (MJ), Mandatory Elective (ME), Open Electives (OE), Minor (MN), Ability Enhancement (AEC), Value education (VEC), Vocational Skill (VSC), Skill enhancement (SEC), Indian Knowledge System (IKS), Co-curricular (CC) courses as well as courses on On-job Training (OJT), Field Project (FP), Community Engagement Programmes (CEP), Research Methodology (RM) and Research Project (RP).

**Chairman,**

**Ad-hoc Board of Studies in Computer Applications Faculty of Commerce and Management, SPPU,  
Pune**

## **II. Vision:**

- Becoming a vibrant knowledge Centre and a Centre of Excellence in teaching, research and extension activities.
- Bringing about conservation, creation advancement and dissemination of knowledge;
- Creating technologically equipped thought and action leaders in a wide range of spheres by providing value-based and high quality education;
- Generating cutting edge research and innovations and enabling empowerment through social and regional inclusion;
- Increasing global linkages by attracting international students and establishing collaborative programmes with educational institution of repute

## **III. Mission:**

*“The Mission of Savitribai Phule Pune University is to be a global, socially conscious Center of Excellence in the conservation, creation, Advancement and dissemination of knowledge, equipped to take up challenges of the enormous change taking place all around and committed to empower its faculty and students to contribute meaningfully to economic, technological and social development and progress.”*

## **IV. Aims:**

- Becoming a vibrant Knowledge Center and a Center of Excellence in teaching, research and extension activities;
- Bringing about conservation, creation, advancement and dissemination of knowledge.
- Creating technologically equipped thought and action leaders in a wide range of spheres by providing value based and high quality education, generating cutting-edge research and innovations, and enabling empowerment through social and regional inclusion;
- Increasing global linkages by attracting international students and establishing collaborative Programmes with educational institutions of repute.

## **V. Learning Outcome Based Curriculum Framework -**

### **1. Programme Education Objectives:**

The Bachelor of Computer Application (Honors) Four Years degree programme has the following objectives...

- I. To prepare the youth to take up positions as system analysts, system engineers, software engineers and programmers.
- II. To aim at developing 'systems thinking' 'abstract thinking', 'skills to analyze and synthesize', and 'skills to apply knowledge', through 'extensive problem solving sessions', 'hands on practice under various hardware/software environments' and ' projects developed'.
- III. To prepare students with 'social interaction skills', 'communication skills', 'life skills', 'entrepreneurial skills', and 'research skills' which are necessary for career growth and for leading quality life are also imparted.

## 2. Programme Outcomes (POs) :

On completion of BCA / (Honors) Three / Four Year Degree Programme the expected programme outcomes that a student should be able to demonstrate are the following:

PO	01:	Demonstrate understanding of fundamental concepts in the field of Computing
PO	02:	Design and develop computer-based applications.
PO	03:	Analyze existing research reported in the literature
PO	04:	Propose alternate solutions by undertaking research work.
PO	05:	Create efficient, reliable, readable and maintainable code.
PO	06:	Demonstrate a deeper understanding of the chosen domain.
PO	07:	Select appropriate method/algorithm to solve the given problem
PO	08:	Explain complex technical concepts clearly and effectively, both in written and oral forms.
PO	09:	Demonstrate ability to collaborate effectively with team members, understand different perspectives, and contribute productively to become successful professional
PO	10:	Demonstrate ability to work with integrity and a sense of social responsibility
PO	11:	Demonstrate self and life-long learning skills
PO	12:	Solve computational problems innovatively
PO	13:	Apply knowledge gained and critical thinking to develop real-world applications

## VI. Duration of the programme:

The duration of the BCA Bachelor's degree Program having six semesters and BCA (Honors) Degree Program is of four years spread across Eight Semesters with multiple entry and exit options. Student should complete the 3/4 years degree programme within 5/6 years.

a) Following EXIT options are available with the students:

Exit Option	Minimum Credits Requirements	NSQF Level
<b>Under graduate Certificate</b> - After successful completion of First Year	44	5
<b>Under graduate Diploma</b> - After successful completion of Second Year	88	6
<b>Bachelor's Degree</b> - After successful completion of Third Year	132	7
<b>Bachelor's Degree with Honors</b> - After successful completion of Fourth Year OR <b>Bachelor's Degree with Honors (Research)</b> - After successful completion of Fourth Year	176 176	8

Note : Student is free to complete some interdisciplinary courses from other institutes provided he/she should earn 50% required credits from home HEI.

Student should complete the core disciplinary courses from home University (HEI) to get exit option for UG certificate/ UG diploma/ Bachelor Degree.

b) Following Entry options are available with the students :

- Student who opt Exit option at the end of 1<sup>st</sup> / 2<sup>nd</sup> / 3<sup>rd</sup> year, can reenter the same programme within three years from Exit.
- Student with Bachelors Degree can opt for Bachelor degree with Honors
- Student with Bachelors Degree can opt for Bachelor degree with Honors (Research) if the student secure CGPA  $\geq 7.5$

### National Skills Qualifications Framework (NSQF) Levels :

Option	NSQF Level	Professional Knowledge	Skill
At the end of first year	5	Knowledge of facts, principles, processes, concepts in a field of work or study	The student will have fundamental knowledge of computation, problem solving ability and basic website designing ability.
At the end of Second year	6	Factual and theoretical knowledge in the broad context within a field of work or study	Additionally the student will have advanced programming skills along with system development ability
At the end of Third year	7	Wide ranging factual and theoretical knowledge in the broad context within a field of work or study	Additionally, student will have skills of Web Application development with Technical Writing and Report Generation.
At the end of Fourth year	8	Comprehensive, cognitive theoretical knowledge and practical skills to develop creative solutions to abstract problem	Additionally, student will have skills of solving business application applying advanced technology

### **VII. Academic Bank Of Credits (ABC) :**

As per the National Educational Policy (NEP) 2020, the Academic Bank of Credit offer the flexibility of curriculum framework and interdisciplinary /multidisciplinary academic mobility of students across Higher Educational Institutes (HEIs) with appropriate credit transfer mechanism.

The credits earned by the student/learner will be stored in it. A Student/learner would be required to complete the course as per the ABC (Academic Bank Credit) policy of UGC. The validity of the credits earned for a course is seven years only.

### **VIII. Eligibility Criteria for admission:**

A candidate applying for BCA(Honors) Four years programme should have passed higher secondary (10 + 2) or equivalent examination (10+3) of any recognized Board with satisfying the conditions to pass a common All India Entrance test (MAH-BCA CET) conducted by CETCELL. The final admission is based solely on the merit of CET.

## IX. Grading System for Programmes under Management Studies:

- **Grade Points** : The 10-point grading system for all Programmes designed by its various Board of Studies. A grading system is a 10-point system if the maximum grade point is 10. The system is given in Table below.

**Table I: The 10-point Grading System Adapted for Programmes**

Range of Percent Marks	[90,100]	[75,89]	[60,74]	[55,59]	[50,54]	[45,49]	[40,44]	[00,39]	Nil
Grade Point	10.0	9.0	8.0	7.0	6.0	5.0	4.0	0.0	0.0
<b>Grade</b>	<b>O</b>	<b>A+</b>	<b>A</b>	<b>B+</b>	<b>B</b>	<b>C</b>	<b>D</b>	<b>F</b>	<b>AB</b>

Formula to calculate GP is as under:

Set  $x = \text{Max}/10$  where Max is the maximum marks assigned for the examination (i.e. 100) Formula to calculate the individual evaluation

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

### ➤ **Scheme of Examination**

Courses having Internal Assessment (IA) and University Examinations (UE) shall be evaluated by the respective constituent units and the University at the term end for **40** and **60** Marks respectively. The total marks of IA and UE shall be 100 Marks and it will be converted into grade points and grades.

For Internal Assessment (IA) the subject teacher may use the following assessment tools:

- a) *Attendance*
- b) *Class Tests*
- c) *Presentations*
- d) *Class Assignments*
- e) *Case studies*
- f) *Practical Assignments*
- g) *Mini Projects*
- h) *Oral*

### **X) MOOCs Policy:-**

As per the guidelines provided by UGC each student have to complete TWO MOOCs (Massive Open Online Courses) as add on Course which provides wide access to the online learning. The student of regular programme should complete MOOCs prescribed by the institute in semester III, Sem IV, and / or Sem V. Each MOOC will be evaluated for TWO credits. The MOOC course fees should be borne by the respective student. On successful completion of MOOCs course, the student should produce the completion certificate to the institute on the basis of which additional Credits will be given to the students.

Following are the sources from where students can undertake MOOCs

1. iimb.ac.in
2. swayam.gov.in
3. alison.com
4. edx.org
5. Coursera
6. harvardx.harvard.edu
7. udemy.com
8. futurelearn.com
9. Indira Gandhi National Open University (IGNOU)
10. National Council of Educational Research and Training (NCERT)
11. National Institute of Open Schooling (NIOS)
12. National Programme on Technology Enhanced Learning (NPTEL)
13. Any other sources offering online courses suggested by institute

## **XI. Standard of Passing:**

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the student/learner must obtain a minimum grade point of 4.0 (40% marks) at UE and also a minimum grade point of 4.0 (40% marks) at IA.

If Student fails in IA, the learner passes in the course provided, he/she obtains a minimum 25% marks in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the learner passes at UE.

A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA he has to reappear only at IA as backlog candidate and clear the Head of Passing to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table

<b>Sr. No.</b>	<b>Range of Marks (%)</b>	<b>Grade Point</b>	<b>Grade Letter</b>
1	$90 \leq \text{Marks} \leq 100$	10	O (Outstanding)
2	$75 \leq \text{Marks} < 89$	9	A+ (Excellent)
3	$60 \leq \text{Marks} < 74$	8	A (Very Good)
4	$55 \leq \text{Marks} < 59$	7	B+ (Good)
5	$50 \leq \text{Marks} < 54$	6	B (Above Average)
6	$45 \leq \text{Marks} < 49$	5	C (Average)
7	$40 \leq \text{Marks} < 44$	4	D (Pass)
8	Marks < 40	0	F (Fail)
9	Nil	0	Ab (Absent)

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

### **Formula to calculate Grade Points (GP)**

Suppose that “Max” is the maximum marks assigned for an examination or evaluation, based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max}/10$  (since we have adopted 10 point system). Then GP is calculated by the following formulas

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} < 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} < 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators, namely the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all the courses since his/her enrolment. The CGPA of learner when he /she completes the programme is the final result of the learner.

The SGPA is calculated by the formula

$$SGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where,  $C_k$  is the Credit value assigned to a course and  $GP_k$  is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the Semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

The CGPA is calculated by the following formula

$$CGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where,  $C_k$  is the Credit value assigned to a course and  $GP_k$  is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrolment and also during the semester for which CGPA is calculated.

The CGPA shall be calculated up to two decimal place accuracy.

**The formula to compute equivalent percentage marks for specified CGPA:**

% marks (CGPA)	$10 * CGPA - 10$	If $5.00 \leq CGPA < 6.00$
	$5 * CGPA + 20$	If $6.00 \leq CGPA < 8.00$
	$10 * CGPA - 20$	If $8.00 \leq CGPA < 9.00$
	$20 * CGPA - 110$	If $9.00 \leq CGPA < 9.50$
	$40 * CGPA - 300$	If $9.50 \leq CGPA \leq 10.00$

## **XII. Award of Honours:**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

<b>Range of CGPA</b>	<b>Final Grade</b>	<b>Performance Descriptor</b>	<b>valent Range of Marks (%)</b>
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} < 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} < 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} < 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} < 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} < 50$
CGPA below 5.0	F	Fail	Marks below 40

## **XIII. Rules of ATKT:**

- a) For admission to Semester V of BCA Third year, Students/Learners should pass all the courses under Sem I and II.
- ii) For admission to Semester VII of BCA Fourth year, Students/Learners should pass all the courses under Sem I, II, III and IV.

## **XIV. INTERNSHIP:**

At the end of Semester VI, each student shall undertake Internship in an Industry for 50 (Fifty Days). It is mandatory for the students to seek written approval from the Faculty Guide about the Topic & the Organisation before commencing the Internship.

During the Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or telecom. Internship Project should be a Computer Application to Real life business activity.

The learning outcomes and the utility to the organization must be highlighted in Internship Project Report.

### **General chapterization of the report shall be as under:**

- 1) Introduction
- 2) Theoretical background
- 3) Company profile
- 4) Objectives of the study

- 5) System Requirements
- 6) System Analysis & Design
- 7) Implementation & Testing
- 8) Conclusion & Suggestions
- 9) References:
- 10) Annexure:

### **TECHNICAL DETAILS:**

1. The report shall be printed on A-4 size white bond paper.
2. 12 pt. Times New Roman font shall be used with 1.5 line spacing for typing the report.
3. 1” margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.
5. The report shall be hard bound as per the standard format of the cover page given by the Institute and shall be golden embossed.
6. The report should include a Certificate (on company’s letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Director of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.
9. In addition to this students should prepare two soft copies of their Summer IP reports & submit one each in Training & Placement Department of the Institute & Library

The Internship shall be assessed out of 200 Marks. The breakup of these marks is as under;

Viva- voce examination = 120 (One Hundred Twenty) Marks

Internship Report = 80 (Eighty) Marks

Total 200 (Two Hundred) Marks

The examiners’ panel shall be decided as per the guidelines received from the University.

The viva –voce shall evaluate the project based on

- i. Actual work done by the student in the organization
- ii. Student’s knowledge about the company & Business Environment
- iii. Learning outcomes for the student
- iv. Utility of the study to the organization

## **XV. Project ( community Based/Software based )**

The project work would expose students to the socio-economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems.

As a part of Sem-VII, each student shall undertake Community based project related the areas of community engagement and service, environmental education, and value-based education.

It is mandatory for the students to seek written approval from the Faculty Guide about the Topic before commencing the project work. The topic may relate survey based or software based problem. The learning outcomes and the utility to the society must be highlighted in Project Report.

## **XVI. Specializations:**

BCA three year degree programme and BCA(Hons.) four year degree programme 2022 offers specialization to the students/learners in the third year of both the programmes. The students/learner are required to select any one specialization from the list provided below.

<b>Sr. No.</b>	<b>Specialization Course</b>	<b>Course No</b>	<b>Course Name</b>
01	<b>Data Analysis</b>	504-1-A	Data analysis using Excel
		604-1-B	R Programming
02	<b>Information Security</b>	504-2-A	Information Security Concepts
		604-2-B	Information Security Administration
03	<b>Data Science</b>	504-3-A	Statistical Programming using R
		604-3-B	Introduction to Data Science
04	<b>Information Systems</b>	504-4-A	E-Commerce
		604-4-B	Knowledge Management

### **Prerequisite for offering the specialization –**

- There must be minimum 10 (Ten) students for a particular specialization.

**XVII. Course Structure:**

**Exit option:** Award of **UG Diploma** in Bachelor of Computer Applications (BCA) with **88 credits** and an **additional 4 credits** (for **either** a course by Microsoft/CCNA/Salesforce/Google/AWS/Oracle/ RedHat etc. **or** Swayam/ NPTEL/MKCL MOOC course equivalent to core NSQF course **or** an internship) **or else** Continue with Major and Minor

# SYLLABUS

# SEMESTER III

**Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
CA – 201 - MJ: Data Structures**

<b>Teaching Scheme: Theory: 02 Hrs./Week</b>	<b>Credits 02</b>	<b>Examination Scheme: Continuous Evaluation: 15 Marks End- Semester: 35 Marks</b>
--	-----------------------	--

**Course Objectives:**

1. To study various data structures
2. To learn analysis of algorithms
3. To understand real-world applications of data structures.

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** Define various data structures and notations for algorithm analysis

**CO2:** Design algorithms using suitable data structure(s)

**CO3:** Compare various representations of a stack, queue, tree and graph

**CO4:** List real world applications of stacks, queues, trees and graphs

**CO5:** Apply appropriate data structure(s) to solve a given problem

**CO6:** Evaluate the time and space complexity of the given algorithm/program

**Course Contents**

<b>Unit I</b>	<b>Introduction to Data Structure</b>	<b>05 Hrs.</b>
---------------	---------------------------------------	----------------

- 1.1 Introduction, Basic concepts, Data types and data objects.
- 1.2 Abstract Data Types (ADT)
- 1.3 Types of Data Structures: Linear and non-linear
- 1.4 Algorithm analysis: Frequency counts, Space and Time complexity, Asymptotic notation: Big O, Omega ( $\Omega$ ) (With examples)

<b>Unit II</b>	<b>Arrays</b>	<b>05 Hrs.</b>
----------------	---------------	----------------

- 2.1 Introduction
- 2.2 Matrix representation using arrays: Row and column major, operations on matrices, Sparse Matrix
- 2.3 Sorting techniques with time complexity: Bubble sort, Insertion sort, Merge sort, Quick sort
- 2.4 Searching techniques with time Complexity: Linear search and Binary search

<b>Unit III</b>	<b>Linked Lists</b>	<b>05 Hrs.</b>
-----------------	---------------------	----------------

- 3.1 Introduction
- 3.2 Representation
- 3.3 Types of linked lists: Singly, Doubly, Circular (Singly, Doubly)
- 3.4 Operations on link list: Create, Display, Insert, Delete, Reverse, Search, Sort, Concatenation, Merge
- 3.5 Real world applications of Link list: Polynomial Representation, Addition of two polynomials

<b>Unit IV</b>	<b>Stacks and Queues</b>	<b>05 Hrs.</b>
4.1	Introduction	
4.2	Representation of Stack: Using arrays and Linked Lists	
4.3	Operations on stack: push, pop	
4.4	Applications of Stack: Recursion, Expressions: Infix to postfix, postfix to infix	
4.5	Representation of Queues: Static (Array) and Dynamic (Linked List)	
4.6	Operations on queue: insert, delete	
4.7	Types of queues: Circular queue and Priority queue	
4.8	Real world Applications of queue (Implementation not expected)	
<b>Unit V</b>	<b>Trees</b>	<b>05 Hrs.</b>
5.1	Introduction and terminologies	
5.2	Types of Binary Trees -Rooted Binary Tree, Full Binary Tree, Complete Binary Tree and Skewed Binary Tree, Expression Tree	
5.3	Representation of Trees using arrays and linked lists, traversals (In-order, pre-order, post-order) and operations (Create, Insert, delete, modify, counting nodes etc.)	
5.5	Applications of Binary trees – Expression conversions and evaluation	
5.6	Binary Search Tree (BST): Introduction and Definition, operations on BST (Create, insert node, delete node, search node) and applications	
<b>Unit VI</b>	<b>Graphs</b>	<b>05 Hrs.</b>
6.1	Introduction and Graph terminologies	
6.2	Representation of a Graph -	
6.2.1	Adjacency matrix	
6.2.2	Adjacency list	
6.2.3	Adjacency multi-list	
6.3	Graph Traversals -	
6.3.1	DFS (Depth First Search)	
6.3.2	BFS (Breadth First Search)	
<b>Books</b>		
1.	Horowitz, Ellis and Sahani Sartaj, “Fundamentals of Data Structures”, 1 <sup>st</sup> Edition, Galgotia, 1984	
2.	Kamthane, Ashok N., “Introduction to Data Structures using C”, 1 <sup>st</sup> Edition, Pearson, 2004	
3.	Bandopadhyaya, S. K. and Dey, K. S. “Data Structures using C”, 1 <sup>st</sup> Edition, Pearson, 2004	
4.	Srivastava, S. K. and Srivastava, D., “Data Structures using C”, 1 <sup>st</sup> Edition, BPB Publication, 2004	
5.	Gilberg, Richard F. and Forouzan, Behrouz A., “Data Structures: A Pseudocode approach with C”, 2 <sup>nd</sup> Edition, Cengage Learning, 2007	
6.	Steven S. S., “The Algorithm Design Manual”, 2 <sup>nd</sup> Edition, Springer, 2008	

**Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
CA - 202 - MJP: Lab course on CA – 201 – MJ**

<b>Teaching Scheme: Practical: 04 Hrs./Week/ Batch</b>	<b>Credits 02</b>	<b>Examination Scheme: Continuous Evaluation: 15 Marks End- Semester: 35 Marks</b>
--	-----------------------	--

**Course Objectives:**

1. To understand algorithms and analysis of algorithms
2. To learn static and dynamic data structures.

**Course Outcomes:** After successful completion of this course, learner will be able to

**CO1:** Apply appropriate data structures to solve the given problem **CO2:**

Design an efficient algorithm for the given problem and implement **CO3:**

Determine the time and space complexity of a given algorithm

**Guidelines for Instructor's Manual**

The instructor shall prepare instructor's manual consisting of university syllabus, conduction and Assessment guidelines.

**Guidelines for Student Journal**

The student shall perform each laboratory assignment and submit the same in the form of a journal. Journal shall have a Certificate, table of contents, and **handwritten write-up** of each assignment (Title, Objectives, Problem Statement, Program Outputs, software and Hardware requirements, Date of Completion, Assessment grade/marks and signature of the instructor).

**Guidelines for Assessment**

The instructor shall carry out internal evaluation of laboratory assignments of 15 marks on a continuous basis throughout the semester. For each lab assignment, the instructor shall assign grade/marks based on parameters with appropriate weightage. Suggested parameters include-timely completion, performance, innovation, efficient codes, code documentation, punctuality and neatness of the write-up etc.

A pair of examiners shall conduct end semester examination of 35 marks in the form of practical examination based on journal assignments. Examiners shall ask questions about journal assignments and / or problem statement provided during practical examination to judge understanding of concepts by the students.

<b>Assignment Nos</b>	<b>List of Assignments</b>	<b>Number of Hrs.</b>
1	Non-Recursive Sorting Techniques <ul style="list-style-type: none"> <li>• Bubble Sort</li> <li>• Insertion Sort</li> </ul>	4
2	Recursive Sorting Techniques <ul style="list-style-type: none"> <li>• Quick Sort</li> <li>• Merge Sort</li> </ul>	6
3	Searching Techniques <ul style="list-style-type: none"> <li>• Linear search</li> <li>• Binary search</li> </ul>	2
4	Linked List <ul style="list-style-type: none"> <li>• Implementation of Linked List, Singly Circular Linked List, Doubly Linked List, Doubly Circular Linked List, operations</li> </ul>	12
5	Stacks and Queues <ul style="list-style-type: none"> <li>• Static Stack Implementation and operations</li> <li>• Dynamic Stack Implementation</li> <li>• Applications of Stack -Expression Conversions</li> <li>• Static Queue Implementation and operations</li> <li>• Dynamic Queue Implementation</li> </ul>	12
6	Binary Trees and Binary Search Tree (Dynamic) <ul style="list-style-type: none"> <li>• Operations on Binary trees – Traversing, level wise printing of nodes, counting total nodes, computed depth, Insert, Delete and search node</li> <li>• BST-create, traverse, count total nodes, Insert, Delete and search node</li> </ul>	12
7	Graphs <ul style="list-style-type: none"> <li>• Adjacency Matrix Representation</li> <li>• Adjacency List Representation</li> <li>• In-degree and Out-degree calculation</li> <li>• BFS, DFS Implementation</li> </ul>	12

**Savitribai Phule Pune University**  
**Second Year Bachelor of Computer Applications**  
**CA – 211 - VSC: C++ Programming**

**Teaching Scheme: Theory: 02 Hrs./Week**

**Credits 02**

**Examination Scheme: Continuous Evaluation: 15 Marks End-Semester: 35 Marks**

**Course Objectives:**

1. To understand of basic object-oriented concepts.
2. To understand C++ features like operator overloading, constructor and destructor, inheritance, polymorphism.
3. To test and execute C++ programs.

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** To understand and apply Object-Oriented Programming (OOP) principles.

**CO2:** Implement core C++ features for structured programming

**CO3:** To understand, develop robust and flexible C++ concepts using advanced OOP features.

**CO4:** Master polymorphism and file handling for practical C++ solutions.

**Course Contents**

<b>Unit I</b>	<b>Introduction to C++</b>	<b>02 Hrs.</b>
1.1 Basic concepts, advantages and applications of OOP 1.2 Introduction, applications of C++ 1.3 Input and Output operator in C++ 1.4 Elementary C++ program		
<b>Unit II</b>	<b>Beginning with C++</b>	<b>05 Hrs.</b>
2.1 Data type and Keywords 2.2 Declaration of variables, dynamic initialization of variables, reference variable 2.3 Operators: Scope resolution operator, Memory management operators 2.4 Manipulators 2.5 Functions: Function prototyping, call by reference and return by reference, Inline functions		
<b>Unit III</b>	<b>Classes and Objects</b>	<b>06 Hrs.</b>
3.1 Class, Object and its structure 3.2 Access specifiers, defining data member 3.3 Defining member functions 3.4 C++ program using class 3.5 Memory allocation 3.6 Static data members and static member functions 3.7 Array of objects 3.8 Friend function and Friend class		

<b>Unit IV</b>	<b>Constructors and Destructors</b>	<b>05 Hrs.</b>
4.1 Constructors and its types 4.2 Multiple constructors in a class and with default argument 4.3 Dynamic constructor 4.4 Destructor		
<b>Unit V</b>	<b>Inheritance</b>	<b>04 Hrs.</b>
5.1 Introduction: Defining Base class and Derived class 5.2 Types of Inheritance 5.3 Virtual base class and abstract class		
<b>Unit VI</b>	<b>Polymorphism</b>	<b>04 Hrs.</b>
6.1 Compile Time Polymorphism: Introduction, rules for overloading operators, Function overloading, Operator Overloading, String manipulation using operator overloading 6.2 Runtime Polymorphism: Virtual functions and pure virtual functions		
<b>Unit VII</b>	<b>Managing console, I/O operations</b>	<b>04 Hrs.</b>
7.1 C++ streams and C++stream classes 7.2 Formatted and Unformatted I/O operations 7.3 File Handling: Stream Classes for File operations, File operations -Opening, Closing and updating, File updating with random access. Error handling during File operations		
<b>Books</b>		
<ol style="list-style-type: none"> <li>Balagurusamy, E., "Object-Oriented Programming with C++", 8th Edition, McGraw Hill Education, 2020.</li> <li>Stroustrup, Bjarne, "The C++ Programming Language", 4th Edition, Addison-Wesley Professional, 2013.</li> <li>Lippman, Stanley B., Lajoie, Josée, and Moo, Barbara E., "C++ Primer", 5th Edition, Addison-Wesley Professional, 2012.</li> <li>Stroustrup, Bjarne, "Programming: Principles and Practice Using C++", 2nd Edition, Addison-Wesley Professional, 2014.</li> <li>Schildt, Herbert, "The Complete Reference C++", 4th Edition, McGraw Hill Education, 2003.</li> <li>Lafore, Robert, "Object Oriented Programming in C++", 4th Edition, Sams Publishing, 2002.</li> </ol>		

**Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
CA - 221 - VSC: C++ Programing**

<b>Teaching Scheme: Practical: 04 Hrs./ Week / Batch</b>	<b>Credits 02</b>	<b>Examination Scheme: Continuous Evaluation: 15 Marks End- Semester: 35 Marks</b>
--	-----------------------	--

**Course Objectives:**

1. To understand Object Oriented Programming concepts using the C++.
2. To study principles of data abstraction, inheritance and polymorphism.
3. To learn Virtual functions and polymorphism.
4. To know Formatted I/O and unformatted I/O.

**Course Outcomes:** After successful completion of this course, the learners will be able to,

**CO1:** Compare the procedural and object-oriented paradigms

**CO2:** Use Classes, Objects, constructors, destructors etc.

**CO3:** Illustrate the concept of function overloading, operator overloading, inheritance, virtual functions and polymorphism.

**CO4:** Apply exception handling

**CO5:** Demonstrate use of various OOPs concepts with the help of programs

**Guidelines for Instructor's Manual**

The instructor shall prepare instructor's manual consisting of university syllabus, conduction and Assessment guidelines.

**Guidelines for Student Journal**

The student shall perform each laboratory assignment and submit the same in the form of a journal. Journal shall have a Certificate, table of contents, and **handwritten write-up** of each assignment (Title, Objectives, Problem Statement, Program Outputs, software and Hardware requirements, Date of Completion, Assessment grade/marks and signature of the instructor).

**Guidelines for Assessment**

The instructor shall carry out internal evaluation of laboratory assignments of 15 marks throughout the semester. For each lab assignment, the instructor shall assign grade/marks based on parameters with appropriate weightage. Suggested parameters include-timely completion, performance, innovation, efficient codes, code documentation, punctuality and neatness of the write-up etc.

A pair of examiners shall conduct end semester examination of 35 marks in the form of practical examination based on journal assignments. Examiners shall ask questions about journal assignments and / or problem statement provided during practical examination to judge understanding of concepts by the students.

**List of Assignments**

The instructor shall cover necessary theoretical concepts in object-oriented programming such as objects, classes, data abstraction, encapsulation, data members, methods, access specifiers, inheritance, polymorphism, operator and function overloading, abstract classes, virtual function, file and exception handling etc.

<b>Topic Name</b>	<b>Object Oriented Programming and functions in C++</b>	<b>20 Hrs.</b>
Assignment No 1: Creation of classes, objects, methods, access specifiers, input-output Assignment No 2: Scope resolution operator, static members, call by reference Assignment No 3: Inline function, friend class and function.		
<b>Topic Name</b>	<b>Inheritance and Polymorphism</b>	<b>20 Hrs.</b>
Assignment No 4: Constructor and destructor Assignment No 5: Single inheritance and multiple inheritance Assignment No 6: Multilevel inheritance and Hierarchical Inheritance, Hybrid inheritance Assignment No 7: Polymorphism (Function overloading) Assignment No 8: Polymorphism (Operator overloading)		
<b>Topic Name</b>	<b>File Handling and Exception Handling</b>	<b>20 Hrs.</b>
Assignment No. 9: Operations on files (Read, Write, Open, Close), Random Access file functions Assignment No 10: Exception handling Assignment No.11: Hash tables and Dictionaries		
<b>Books</b>		
<ol style="list-style-type: none"> <li>1. B. Stroutstrup, "The C++ Programming Language", 3<sup>rd</sup> Edition, Pearson Education, 2000.</li> <li>2. T. Gaddis, J. Walters and G. Muganda, "OOP in C++", 7<sup>th</sup> Edition, Pearson Education, 2010.</li> <li>3. R. Lafore, "Object Oriented Programming in C++", 3<sup>rd</sup> Edition, Galgotia Publications Pvt. Ltd, 2004.</li> <li>4. Herbert Schildt, "The Complete Reference C++", 4<sup>th</sup> Edition, Tata McGraw Hill, 2014.</li> <li>5. <b>Savitribai Phule Pune University Second Year Bachelor of Computer Applications CA - 231 - FP: Field work</b>		
<b>Teaching Scheme:</b> <b>Practical: 04 Hrs./ Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 15 Marks End-Semester: 35 Marks</b>
<b>Course Objectives:</b> <ol style="list-style-type: none"> <li>To provide exposure to the students and sensitize them to field issues/problems</li> <li>To understand methodology used to perform field work</li> </ol>		
<b>Course Outcomes:</b> After successful completion of this course, the learners will be able to <b>CO1:</b> Apply methodology to perform field work <b>CO2:</b> Identify and define real-world issues or problems <b>CO3:</b> Analyze the data collected and propose solution to solve real-world problem		
<b>Guidelines for the faculty</b>		
<p>A faculty shall be assigned as a guide for each group of 3 / 4 students.</p> <p>The guide assigned for each group shall assist the assigned student group(s) for identifying topic/area (topic list is provided below for reference) for the field work, objectives and outcomes, preparation of questionnaire, resources/tools needed and guide the students for possible solutions and report preparation</p> <p>The guide assigned for each group shall monitor, track and assess the progress of work carried out by students throughout the semester</p>		
<b>Guidelines for Students</b>		
<p>The student shall work in a group of 3 or 4 students. Each group shall select topic/area for the fieldwork to be undertaken by them in consultation with their assigned guide.</p> <p>The group shall discuss and decide objectives, outcomes, overall plan for fieldwork, methodology to be adopted, such as preparation of a questionnaire for conduction of survey or methods for data gathering, tools to be used for analysis etc. and get the plan approved from their guide.</p> <p>Each group shall carry out fieldwork during their free slots, or before/after college hours or on Sundays or holidays. The students shall maintain a diary giving details of tasks performed by them, observations/study notes etc.</p> <p>The suggested timelines for the field work are</p> <ul style="list-style-type: none"> <li>• Formation of group – 1 week</li> <li>• Selection of topic for field study – 2 Week</li> <li>• Discussions and finalization of objectives, outcomes and methodology to be used – 3 Weeks</li> <li>• Field work and visits, SWOT/SWOC analysis, group discussions and meeting with guide – Conduction of survey / gathering data etc. – 4Weeks</li> <li>• Preparation of report and presentation – 2 weeks</li> </ul> <p>Each group shall submit a report at the end of the semester consisting of Title, Abstract, Rational of the study, problem definition, objectives, outcomes, methodology used, details of field work performed (Field Visits, Interviews, discussions etc.), analysis, SWOT/SWOC, findings, details of proposed solution (Paper design/prototype/mobile App etc.) and conclusions. Students should also submit geo-tagged photographs, audio-video clips etc.</p>		

### **Guidelines for Assessment**

The instructor shall carry out internal evaluation of fieldwork for 15 marks throughout the semester based on timely completion of the work, analysis, findings and neatness of the report etc.

The end semester examination of 35 marks shall be based on Group presentation and the reports of fieldwork submitted in the journal.

### **List of suggested topics/areas for Field work (but not limited to)**

1. Healthcare (Civil and private hospitals) – HIMS, Telemedicine etc.
2. Schools, colleges, Universities - e-Learning Platforms, MOOCs, ERP, IT Infrastructure and Security systems etc.
3. Agriculture - Use of IoT Devices, drones in Agriculture, Management of Water Distribution, etc.
4. Old age homes and organizations working of differently abled people - Assistive Technologies for Divyanga Personnel, Support for Senior Citizens etc.
5. Organizations/NGOs working on food habits, nutrition, adulterations
6. Urban Region - Smart Cities, Traffic Management, Renewable energy and Solar Systems, Waste collection and disposal, studying water quality and water supply system of the city etc.
7. Rural Region - Smart Villages, Agriculture Product Distribution Systems etc.
8. Government offices and offices of Local Bodies (Corporation/Municipal Corporation/ Grampanchayat - ERP, IT Infrastructure and Security etc.
9. Pollution control boards – study / develop a system to monitor City environmental parameters - Air/Sound/Water pollutions
10. Department of disaster Management – Study /develop response system for allocating resources during natural disasters.
11. Governance - e-Governance Portals, Online Payment Systems etc.
12. Industries (IT/Manufacturing/Telecomm) involved in development of solutions to solve social issues

### **BOOKS**

1. Waterman, A. Service-Learning: A Guide to Planning, Implementing, and Assessing Student Projects. Routledge, 1997.
2. Beckman, M., and Long, J. F. Community-Based Research: Teaching for Community Impact. Stylus Publishing, 2016.
3. Design Thinking for Social Innovation. IDEO Press, 2015.
4. Dostilio, L. D., et al. The Community Engagement Professional's Guidebook: A Companion to The Community Engagement Professional in Higher Education. Stylus Publishing, 2017

**Savitribai Phule Pune University**  
**Second Year Bachelor of Computer Applications**  
**ELS- 241-MN: Data Communication**

**Teaching Scheme:**  
**Theory: 02 Hrs./Week**

**Credits**  
**02**

**Examination Scheme: Continuous**  
**Evaluation: 15 Marks**  
**End-Semester: 35 Marks**

**Course Objectives:**

1. To understand various computer networks and technologies behind networks
2. To study TCP/IP protocol suite, IP addressing schemes and link layer communication
3. To study routing concept along with Routing protocols
4. To study application layer protocols
5. To understand basics of cryptography and socket programming

**Course Outcomes:** After successful completion of this course, the learners will be able to  
CO1: Understand the basic concepts of Computer Network, and principle of layering (Understand)  
CO2: Apply the error detection and correction techniques used in data transmission (Apply)  
CO3: Apply IP addressing schemes and sub netting (Apply)  
CO4: Understand the concept of routing protocols, Application layer protocols and Network Security (Understand)  
CO5: Apply the socket programming basics to create a simple chat application (Apply)

**Course Contents**

<b>Unit I</b>	<b>Introduction to Data Communication</b>	<b>5 Hrs.</b>
---------------	---	---------------

- 1.1 Definition and components of data communication
- 1.2 Data representation (text, numbers, audio, video)
- 1.3 Communication models: Sender, Receiver, Medium, Message, Protocol
- 1.4 Types of data transmission: Analog vs Digital
- 1.5 Data flow directions: Simplex, Half-duplex, Full-duplex
- 1.6 Networks and their categories (LAN, WAN, MAN)
- 1.7 Protocols and standards

<b>Unit II</b>	<b>Transmission Media</b>	<b>5 Hrs.</b>
----------------	---------------------------	---------------

- 2.1 Guided Media: Twisted pair, Coaxial cable, Optical fiber
- 2.1 Unguided Media: Radio waves, Microwaves, Infrared
- 2.2 Comparison of media types (speed, cost, distance, security)
- 2.3 Transmission impairments: Attenuation, Noise, Distortion

<b>Unit III</b>	<b>Data Encoding and Transmission</b>	<b>5 Hrs.</b>
-----------------	---------------------------------------	---------------

- 3.1 Digital-to-Digital Encoding (NRZ, Manchester, etc.)
- 3.2 Analog-to-Digital Conversion (Sampling, Quantization, PCM, Delta Modulation)
- 3.3 Digital-to-Analog (ASK, FSK, PSK, QAM)
- 3.4 Analog-to-Analog (AM, FM, PM)
- 3.5 Bandwidth and Bitrate
- 3.6 Transmission Modes: Synchronous & Asynchronous

<b>Unit IV</b>	<b>Network Devices and Topologies</b>	<b>5 Hrs.</b>
<p>4.1 Devices: Hub, Switch, Router, Bridge, Gateway, Modem</p> <p>4.2 Network Topologies: Bus, Ring, Star, Mesh, Hybrid</p> <p>4.3 Comparison and Applications of each topology</p>		
<b>Unit V</b>	<b>Emerging Trends in Data Communication</b>	<b>5 Hrs.</b>
<p>5.1 Mobile communication (4G/5G overview)</p> <p>5.2 Wireless networks (Wi-Fi, Bluetooth, Zigbee)</p> <p>5.3 Satellite Communication</p> <p>5.4 IoT (Internet of Things) basics</p> <p>5.5 Network virtualisation &amp; cloud-based networking</p>		
<b>Books</b>		
<ol style="list-style-type: none"> <li>1. <i>Data Communications and Networking</i> – Behrouz A. Forouzan – McGraw-Hill Education</li> <li>2. <i>Data and Computer Communications</i> – William Stallings – Pearson Education</li> <li>3. <i>Computer Networks</i> – Andrew S. Tanenbaum, David J. **Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
ELS- 242- MNP: Lab course on ELS – 241 - MN**

<b>Teaching Scheme:</b> <b>Practical: 04 Hrs./Week/ Batch</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 15 Marks End-Semester: 35 Marks</b>
--	-----------------------------	---

**Course Objectives:**

1. Understand the fundamental concepts of data communication systems and signal flow mechanisms.
2. Compare different types of transmission media used in guided and unguided communication.
3. Simulate and implement encoding and modulation techniques used in data transmission.
4. Identify, configure, and analyze the role of network devices and common network topologies.
5. Explore and demonstrate real-world applications of modern communication technologies like IoT, Wi-Fi, and 5G.

**Course Outcomes:** After successful completion of this course, learner will be able to

	<b>Bloom's Level</b>	<b>Description</b>
CO1	Understand	Demonstrate understanding of basic data communication concepts
CO2	Analyze	Compare performance of different transmission media
CO3	Apply	Apply encoding techniques using code/simulation
CO4	Apply & Analyze	Configure networks and analyze device functionality
CO5	Evaluate	Explore and evaluate modern communication technologies

**Guidelines for Instructor's Manual**

The instructor shall prepare instructor's manual consisting of university syllabus, conduction and Assessment guidelines.

**Guidelines for Student Journal**

The student shall perform each laboratory assignment and submit the same in the form of a journal. Journal shall have a Certificate, table of contents, and **handwritten write-up** of each assignment (Title, Objectives, Problem Statement, Program Outputs, software and Hardware requirements, Date of Completion, Assessment grade/marks and signature of the instructor).

**Guidelines for Assessment**

The instructor shall carry out internal evaluation of laboratory assignments of 15 marks on a continuous basis throughout the semester. For each lab assignment, the instructor shall assign grade/marks based on parameters with appropriate weightage. Suggested parameters include-timely completion, performance, innovation, efficient codes, code documentation, punctuality and neatness of the write-up etc.

A pair of examiners shall conduct end semester examination of 35 marks in the form of practical examination based on journal assignments. Examiners shall ask questions about journal assignments and / or problem statement provided during practical examination to judge understanding of concepts by the students.

**Lab Journal Format (for each practical)**

- **Practical No. & Title**
- **Objective**
- **Theory / Concept**
- **Tools / Software Used**
- **Procedure**
- **Screenshots / Output**
- **Result / Conclusion**

<b>Assignment Nos</b>	<b>List of Assignments</b>
1	<b>Simulate Data Flow Types (Simplex, Half-Duplex, Full-Duplex)</b> <ul style="list-style-type: none"><li>➤ Objective: Understand the direction of data flow using Python or diagram tools.</li><li>➤ Tools: Python/C or Packet Tracer animation</li><li>➤ Output: Directional flow simulation between sender and receiver</li></ul>
2	<b>Identify and Document Real-life Examples of Communication Systems</b> <ul style="list-style-type: none"><li>• Objective: Classify systems as analog/digital and simplex/full-duplex.</li><li>• Task: Fill a table based on TV broadcast, telephone, chat, etc.</li></ul>
3	<b>Practical 3: Comparative Analysis of Transmission Media</b> <ul style="list-style-type: none"><li>• Objective: Create a table comparing Twisted Pair, Coaxial, Fiber Optic, Microwave, Infrared.</li><li>• Parameters: Bandwidth, Cost, Distance, Interference, Use Cases</li></ul>
4	<b>Visual Demonstration of Guided vs Unguided Media</b> <ul style="list-style-type: none"><li>• Tools: Packet Tracer or physical lab hardware</li><li>• Task: Draw or simulate connections using different media types</li></ul>
5	<b>Implement Digital Encoding Schemes</b> <ul style="list-style-type: none"><li>• Objective: Write a Python/C program to simulate NRZ, Manchester encoding</li><li>• Output: Bit pattern visualization with timing diagram</li></ul>
6	<b>Simulate Analog Modulation Techniques (ASK/FSK/PSK)</b> <ul style="list-style-type: none"><li>• Tool: MATLAB / Python / Simulation tools</li><li>• Objective: Show how digital bits modulate analog signals</li></ul>
7	<b>Bit Rate and Baud Rate Calculation</b> <ul style="list-style-type: none"><li>• Write a small tool or calculator in Python that takes input and shows bit rate vs baud rate</li></ul>
8	<b>Identify and Compare Networking Devices</b> <ul style="list-style-type: none"><li>• Devices: Hub, Switch, Router, Modem, Gateway, Bridge</li><li>• Task: Physical or simulated demo + table of functionalities</li></ul>
9	<b>Create and Simulate Network Topologies in Packet Tracer</b> <ul style="list-style-type: none"><li>• Topologies: Star, Bus, Ring, Mesh</li><li>• Task: Connect PCs, assign IPs, test ping</li></ul>
10	<b>Troubleshoot Network with Commands</b> <ul style="list-style-type: none"><li>• Commands: ping, ipconfig, tracert, arp, netstat</li><li>• Tools: CMD/Terminal</li><li>• Task: Interpret outputs and explain</li></ul>

**Savitribai Phule Pune University**  
**Second Year Bachelor of Computer Applications**  
**CA – 200 – IKS: Indian Knowledge System for Computing**

<b>Teaching Scheme:</b> <b>Theory: 02 Hrs./Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 15 Marks End-Semester: 35 Marks</b>
--	-----------------------------	---

**Course Objectives:**

1. To study contributions of Indian scholars to computation and logic.
2. To understand Indian methods for Number representations
3. To know use of Sanskrit in Natural language processing
4. To learn ancient cryptography techniques

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** List India's contributions to Computing

**CO2:** Apply Ancient Indian Mathematical concepts in Computing

**CO3:** Utilize Linguistic and Computational aspects of Sanskrit from IKS in Modern Computing

**CO4:** Describe Cryptographic techniques from IKS

**CO5:** Make use of Cybersecurity techniques from IKS

**CO6:** Illustrate the Role of IKS in Emerging Technologies

**Course Contents**

<b>Unit I</b>	<b>Introduction to Indian Knowledge Systems (IKS)</b>	<b>05Hrs.</b>
1.1	Introduction IKS	
1.2	Defining Indian Knowledge System (IKS) and its components,	
1.3	Contribution of Aryabhata and Brahmagupta, Buddhist logico-epistemology	
1.4	The knowledge triangle	
1.5	Prameya -A vaiśeṣikan approach to physical reality	
1.6	Dravyas -the constituents of the physical reality	
1.7	Attributes -the properties of substances and Action -the driver of conjunction and disjunction	
1.8	sāmānya, viśeṣa, samavāya	
1.9	Pramāṇa -the means of valid knowledge	
1.10	Samsaya-ambiguities in existing knowledge.	
<b>Unit II</b>	<b>Number Systems and Units of Measurement</b>	<b>12 Hrs.</b>
2.1	Number systems in India -Historical evidence	
2.2	Salient Features of the Indian Numeral System	
	2.2.1 Concept of zero and its importance,	
	2.2.2 Large numbers and their representation	
	2.2.3 Place Value of Numerals	
	2.2.4 Decimal System	
2.3	Unique approaches to represent Numbers	
	2.3.1 Bhūta-Saṃkhyā system	

	2.3.2 Śūnyabindu System 2.3.3. Piṅgala and the Binary system	
2.4.	Measurements for time, distance, and weight in ancient India	
<b>Unit III</b>	<b>Linguistics</b>	<b>08 Hrs.</b>
3.1	Introduction to Linguistics	
3.2	Aṣṭādhyāyī	
3.3	Phonetics	
3.4	Word generation	
3.5	Computational aspects	
3.6	Mnemonics	
3.7	Recursive operations -Introduction to use of Kaprekar Constant 6174 in recursion	
3.8	Rule based operations	
3.9	Sentence formation	
3.10	Verbs and prefixes	
3.11	Role of Sanskrit in natural language processing	
<b>Unit IV</b>	<b>Ancient Cryptography and Security Systems</b>	<b>05 Hrs.</b>
4.1	The Evolution of India's Intelligence Culture-Kautilya's Discourse on Secret Intelligence in the Arthashastra	
4.2	Kaṭapayādi system	
4.3	Steganography in Kautilya's Arthashastra	
4.4	Cryptographic methods in ancient Indian texts	
4.5	Relevance to modern-day cybersecurity and encryption	
4.6	Introduction to use of Kaprekar Constant (6174) in cryptography	
<b>Books</b>		
1.	B. Mahadevan, Vinayak Rajat Bhat, and R.N. Nagendra Pavana, "Introduction to Indian Knowledge System: Concepts and Applications", PHI Learning, 2022.	
2.	Dee Hetvik, "Ancient Indian encryption: KaTaPaYadi system", Kindle Edition	
3.	<a href="https://www.geeksforgeeks.org/kaprekar-constant/">https://www.geeksforgeeks.org/kaprekar-constant/</a>	

# SYLLABUS

# SEMESTER IV

**Savitribai Phule Pune University**  
**Second Year Bachelor of Computer Applications CA -**  
**251- MJ: Database Management Systems**

<b>Teaching Scheme:</b> <b>Theory: 04 Hrs./Week</b>	<b>Credits</b> <b>04</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 30 Marks End-</b> <b>Semester: 70 Marks</b>
<p><b>Course Objectives:</b></p> <ol style="list-style-type: none"> <li>To understand the fundamental concepts of Relational database management systems</li> <li>To study and understand systematic approaches for design of database systems</li> <li>To learn SQL - the database Query language</li> <li>To know about transaction management and data security</li> </ol>		
<p><b>Course Outcomes:</b> After successful completion of this course, learner will be able to</p> <p><b>CO1:</b> Solve real world problems using appropriate relational data model.</p> <p><b>CO2:</b> Construct E-R Model for given requirements and convert it into database tables.</p> <p><b>CO3:</b> Write efficient SQL queries and use PL/SQL</p> <p><b>CO4:</b> Apply database management operations</p> <p><b>CO5:</b> Describe mechanisms for transaction management</p> <p><b>CO6:</b> Demonstrate understanding of database security</p>		
<b>Unit I</b>	<b>Introduction</b>	<b>06 Hrs.</b>
<ol style="list-style-type: none"> <li>1.1 Introduction to DBMS</li> <li>1.2 File system Vs. DBMS</li> <li>1.3 Data models -relational, hierarchical, network</li> <li>1.4 Levels of abstraction</li> <li>1.5 Data independence</li> <li>1.6 Structure of DBMS</li> <li>1.7 Users of DBMS</li> <li>1.8 Advantages and disadvantages of DBMS</li> </ol>		
<b>Unit II</b>	<b>Conceptual and Relational Database Design</b>	<b>12 Hrs.</b>
<ol style="list-style-type: none"> <li>2.1 Overview of DB design process.</li> <li>2.2 Introduction to data models (E-R model, Relational model, Network model, Hierarchical model)</li> <li>2.3 Conceptual design using ER data model (entities, attributes, entity sets, relations, relationship sets) and symbols. Extended ER Features, ER to Relational Mapping</li> <li>2.4 Constraints (Key constraints, Integrity constraints, referential integrity, unique constraint, Null/Not Null Constraint, Domain Constraint, Check constraint, Mapping constraints, Column level and Table Level Constraint)</li> <li>2.5 Keys in Database (primary key, foreign key, Candidate key, super key)</li> <li>2.6 Extended features - Specialization, Aggregation, Generalization (Pictorial representation).</li> <li>2.7 Structure of Relational Databases (concepts of a table)</li> <li>2.8 Concept of Normalization -Normal forms (only definitions) with example (1NF,2NF,3N,</li> </ol>		

	BCNF, 4NF)	
2.9	Functional dependency - Concept, Closure of Attribute set, Armstrong axioms, Closure of relation( $F^+$ )	
2.10	Decomposition - Concept, Properties of Decomposition (Lossless joins and Dependency preservation)	
<b>Unit III</b>	<b>Structured Query Language (SQL)</b>	<b>10 Hrs.</b>
3.1	Introduction to SQL.	
3.2	DDL commands with examples (Create, Drop, Alter)	
3.3	DML commands with examples (Insert, Update, Delete)	
3.4	Basic structure of SQL Select query	
3.5	SQL Operations (Aggregate functions, Set operations, Date, Time, String functions and Null values, Nested Sub queries)	
3.6	Join Queries (Cartesian Product, Inner joins, Outer - Left, Right, Full)	
3.7	Views (Create, Alter, Drop)	
3.8	Examples on SQL (case studies)	
<b>Unit III</b>	<b>Structured Query Language (SQL)</b>	<b>10 Hrs.</b>
3.1	Introduction to SQL.	
3.2	DDL commands with examples (Create, Drop, Alter)	
3.3	DML commands with examples (Insert, Update, Delete)	
3.4	Basic structure of SQL Select query	
3.5	SQL Operations (Aggregate functions, Set operations, Date, Time, String functions and Null values, Nested Sub queries)	
3.6	Join Queries (Cartesian Product, Inner joins, Outer - Left, Right, Full)	
3.7	Views (Create, Alter, Drop)	
3.8	Examples on SQL (case studies)	
<b>Unit IV</b>	<b>Introduction to PL/Postgres SQL</b>	<b>12 Hrs.</b>
4.1	PL/Postgres SQL: Language structure	
4.2	Control structures (Conditional Statements and loops)	
4.3	Stored Procedures.	
4.4	Functions	
4.5	Handling errors and exceptions	
4.6	Cursors	
4.7	Triggers	
<b>Unit V</b>	<b>Transaction Management</b>	<b>12 Hrs.</b>
5.1.	Transaction	
	5.1.1.1.1 Properties of transaction	
	5.1.1.1.2 States of transactions	
	5.1.1.1.3 Concurrent execution of transactions	
	5.1.1.1.4 Conflicting operations	
5.2	Schedules	
	5.2.1.1.1 Types of schedules	

5.3	Concept of serializability	
5.3.1	Precedence graph for serializability	
5.4	Basic timestamp protocol for concurrency, Thomas Write Rule.	
5.5	Two-phase Locking protocol, Timestamps vs. Locking.	
5.6	Deadlock and Deadlock Handling - Deadlock Avoidance, Deadlock Detection and Deadlock Recovery	
5.7	Log Base Recovery Techniques - Deferred and Immediate Updates	
<b>Unit VI</b>	<b>Database Security</b>	<b>8 Hrs.</b>
6.1	Introduction to database security concepts	
6.2	Methods for database security	
6.3	Access Control Method	
6.3.1	Discretionary access control method	
6.3.2	Mandatory access control	
6.3.3	Role based access control for multilevel security	
6.4	Use of views in security enforcement	
6.5	Overview of encryption technique for security	
6.6	Statistical database security.	
<b>Books</b>

<b>Savitribai Phule Pune University Second Year Bachelor of Computer Applications CA – 252 - MJP: Lab course on CA - 251 - MJ</b>		
<b>Teaching Scheme Lab: 04 Hrs./ Week/ Batch</b>	<b>Credits 02</b>	<b>Examination Scheme: Continuous Evaluation: 15 Marks End- Semester: 35 Marks</b>
<b>Course Objectives:</b> <ol style="list-style-type: none"> <li>To study DDL and DML Queries</li> <li>To understand SQL and PL/SQL</li> </ol>		
<b>Course Outcomes:</b> After successful completion of this course, learner will be able to <b>CO1:</b> Design E-R Model for given requirements and convert the same into database tables. <b>CO2:</b> Design and create relational database systems. <b>CO3:</b> Use SQL DDL and DML commands CO4: Apply constructs in PL/PGSQL		
<b>Guidelines for Instructor's Manual</b>		
The instructor shall prepare instructor’s manual consisting of University syllabus, conduction and Assessment guidelines.		
<b>Guidelines for Student Journal</b>		
The student shall perform each laboratory assignment and submit the same in the form of a journal. Journal shall have a Certificate, table of contents, and <b>handwritten write-up</b> of each assignment (Title, Objectives, Problem Statement, Program Outputs, software and Hardware requirements, Date of Completion, Assessment grade/marks and signature of the instructor).		
<b>Guidelines for Assessment</b>		
The instructor shall carry out internal evaluation of laboratory assignments of 15 marks throughout the semester. For each lab assignment, the instructor shall assign grade/marks based on parameters with appropriate weightage. Suggested parameters include-timely completion, performance, innovation, efficient codes, code documentation, punctuality and neatness of the write-up etc.		
A pair of examiners shall conduct end semester examination of 35 marks in the form of practical examination based on journal assignments. Examiners shall ask questions about journal assignments and / or problem statement provided during the practical examination to judge understanding of concepts by the students.		
<b>List of Assignments</b>		
<b>Assignment No 1</b>	<b>Simple table design (DDL) Commands</b>	<b>4 Hrs.</b>
Create simple tables including all data types. <ul style="list-style-type: none"> <li>Primary key constraint (as a table level constraint and as a column level constraint)</li> <li>Check constraint (All types)</li> <li>Unique constraint, Null/Not null constraint</li> </ul>		

<b>Assignment No 2</b>	<b>Simple tables using referential constraint (DDL) commands</b>	<b>4 Hrs.</b>
<ul style="list-style-type: none"> <li>• Create more than one table and access them using referential integrity constraint.</li> </ul>		
<b>Assignment No 3</b>	<b>DDL commands</b>	<b>4 Hrs.</b>
<ul style="list-style-type: none"> <li>• Drop a table, Alter schema of a table.</li> <li>• Insert / Update / Delete records using tables created in previous Assignments</li> </ul>		
<b>Assignment No 4</b>	<b>DML commands</b>	<b>8 Hrs.</b>
<ul style="list-style-type: none"> <li>• Write queries on the tables using SQL select query <ul style="list-style-type: none"> <li>➤ Select &lt;field-list&gt; from table [where &lt;condition&gt; order by &lt;field list&gt;], Select &lt;field-list, aggregate functions&gt; from table [where &lt;condition&gt; group by &lt;&gt; having &lt;&gt; order by &lt;&gt;]</li> </ul> </li> <li>• To create views and retrieve data using the views</li> </ul>		
<b>Assignment No 5</b>	<b>DML commands</b>	<b>4 Hrs.</b>
<ul style="list-style-type: none"> <li>• Write queries using set operations (minus operation, union, union all, intersect, intersect all)</li> </ul>		
<b>Assignment No 6</b>	<b>Nested Queries</b>	<b>4 Hrs.</b>
<ul style="list-style-type: none"> <li>• Write nested queries using Except, Except all, Exists, Not exists etc.</li> </ul>		
<b>Assignment No 7</b>	<b>Stored Procedure</b>	<b>6 Hrs.</b>
<ul style="list-style-type: none"> <li>• Create a Simple Stored Procedure</li> <li>• Create a Stored Procedure with IN, OUT and IN/OUT parameter</li> </ul>		
<b>Assignment No 8</b>	<b>Function</b>	<b>6 Hrs.</b>
<ul style="list-style-type: none"> <li>• Create and use a Simple Stored Function</li> <li>• Create and use a simple Stored Function that returns</li> <li>• Create and use a simple Stored recursive Function</li> </ul>		
<b>Assignment No 9</b>	<b>Cursor</b>	<b>4 Hrs.</b>
<ul style="list-style-type: none"> <li>• Create and use a Simple Cursor</li> <li>• Create and use a Parameterized Cursor</li> </ul>		
<b>Assignment No 11</b>	<b>Exception Handling</b>	<b>4 Hrs.</b>
<ul style="list-style-type: none"> <li>• Create and use a Simple Exception-Raise Debug Level Messages</li> <li>• Create and use a Simple Exception-Raise Notice Level Messages</li> <li>• Create and use a Simple Exception-Raise Exception Level Messages</li> </ul>		
<b>Assignment No 12</b>	<b>Triggers</b>	<b>10 Hrs.</b>
<ul style="list-style-type: none"> <li>• Create and perform insert, update, delete using a Before Trigger &amp; an After Trigger</li> <li>• Creating EER Diagram and schemas using MySQL- Workbench or any such tools</li> <li>• Store data in simple DBMS and retrieve it in spreadsheets using SQL query</li> </ul>		

**Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
CA – 271 - VSC: Python Programming**

**Teaching Scheme:**  
**Practical: 04 Hrs./ Week/ Batch**

**Credits**  
**02**

**Examination Scheme: Continuous**  
**Evaluation: 15 Marks End-**  
**Semester: 35 Marks**

**Course Objectives:**

1. To introduce programming concepts using Python
2. To understand various constructs in Python
3. To test and execute Python programs.

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** Write Python programs to solve a given problem

**CO2:** Choose appropriate data structures such as lists, dictionaries, tuples, and sets.

**CO3:** Develop Python programs to implement the given small applications.

**Guidelines for Instructor's Manual**

The instructor shall prepare instructor's manual consisting of University syllabus, conduction and Assessment guidelines.

**Guidelines for Student Journal**

The student shall perform each laboratory assignment and submit the same in the form of a journal. Journal shall have a Certificate, table of contents, and **handwritten write-up** of each assignment (Title, Objectives, Problem Statement, Program Outputs, software and Hardware requirements, Date of Completion, Assessment grade/marks and signature of the instructor).

**Guidelines for Assessment**

The instructor shall carry out internal evaluation of laboratory assignments of 15 marks throughout the semester. For each lab assignment, the instructor shall assign grade/marks based on parameters with appropriate weightage. Suggested parameters include-timely completion, performance, innovation, efficient codes, code documentation, punctuality and neatness of the write-up etc.

A pair of examiners shall conduct end semester examination of 35 marks in the form of practical examination based on journal assignments. Examiners shall ask questions about journal assignments and / or problem statement provided during practical examination to judge understanding of concepts by the students.

### List of assignments

The instructor shall cover theoretical aspects such as Data types, declarations, input / output, control flow, Strings and Functions List, Tuples, Dictionary and Sets etc.

Assignment No.	Topics for the Assignments	Number of Hrs.
1	Basic Python	06
2	Control structures and operators	08
3	Python Strings	08
4	Python Functions	08
5	Python Lists	08
6	Python Tuples	08
7	Python Dictionary	08
8	Python Sets	06
<b>Total</b>		<b>60</b>

### BOOKS

1. Montojo, Jason, Campbell, Jennifer and Gries Paul, "Practical Programming: An Introduction to Computer Science using Python 3", 2<sup>nd</sup> Edition, O'Reilly, 2013
2. Payne James, "Beginning Python: Using Python and Python 3.1", 1<sup>st</sup> Edition, Wrox Publication, 2010
3. Dierbach Charles, "Introduction to Computer Science Using Python", 1<sup>st</sup> Edition, Wiley Publication, 2015
4. Balagurusamy E., "Introduction to Computing and Problem-Solving using Python, 1<sup>st</sup> Edition, Tata McGraw Hill publication, 2017
5. Mueller John P., "Beginning Programming with Python for Dummies", 1<sup>st</sup> Edition, Dummies, 2014

**Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
CA – 271 - CEP: Community services**

**Teaching Scheme:**  
**Practical: 04 Hrs./ Week**

**Credits**  
**02**

**Examination Scheme: Continuous**  
**Evaluation: 15 Marks End-**  
**Semester: 35 Marks**

**Course Objectives:**

1. To provide exposure to the students and sensitize them for community issues/problems
2. To know levels of community engagements (Informative, participative and decision-making participations)

**Course Outcomes:** After successful completion of this course, the learners will be able to **CO1:** Identify and define community engagement service to address community problem **CO2:** Choose appropriate community engagement level to solve the problem  
**CO3:** Analyze and propose possible solution to solve community problem

**Guidelines for the faculty**

A faculty shall be assigned as a guide for each group of 3 / 4 students.  
The guide assigned for each group shall assist the assigned student group(s) for identifying topic/area (topic list is provided below for reference) for the community engagements, objectives and outcomes, preparation of questionnaire, resources/tools needed and guide the students for possible solutions and report preparation. The guide assigned for each group shall monitor, track and assess the progress of work carried out by students throughout the semester

**Guidelines for Students**

The student shall work in a group of 3 or 4 students. Each group shall select topic/area for the community engagement to be undertaken in consultation with their assigned guide.  
The group shall discuss and decide objectives, outcomes, overall plan for possible activities during community engagement, methodology to be adopted, such as preparation of a questionnaire for conduction of survey or methods for data gathering, tools to be used for analysis etc. and get the plan approved from their guide.  
Each group shall carry out activities during their free slots, or before/after college hours or on Sundays or holidays. The students shall maintain a diary giving details of tasks performed by them, observations/study notes etc.

The suggested timelines for the field work are

- Formation of group – 1 week
- Selection of topic for community engagement – 2 Week
- Discussions and finalization of objectives, outcomes and methodology to be used – 3 Weeks
- Activities for community engagement - Conduction of survey / gathering data, Awareness programs, interviews, group discussions and meeting with guide — 4Weeks
- Preparation of report and presentation – 2 weeks

Each group shall submit a report at the end of the semester consisting of Title, Abstract, Rational of the study, problem definition, objectives, outcomes, methodology used, details of activities undertaken, analysis, findings, details of proposed solution (paper design/prototype/mobile app etc.) and conclusions. Students should also submit photographs, audio-video clips etc.

### **Guidelines for Assessment**

The instructor shall carry out internal evaluation of work for 15 marks throughout the semester based on timely completion of the work, analysis, findings and neatness of the report etc.

The end semester examination of 35 marks shall be based on group presentation and the reports of activities participated.

### **List of suggested topics/areas for Community Services (but not limited to)**

1. Schools and colleges – Awareness about environment issues, cyber security, health and nutrition, new policies by government, Training programs for students and teachers, etc.
2. Agriculture - Awareness programs for farmers, in association with agriculture officers on Plantation and Soil protection, Bio-diversity, Organic farming, promotion of local crops, marketing, sales and logistics for agro products etc.
3. Old age homes and organizations working of differently abled people – Awareness programs for Senior Citizens and differently abled people and their interviews etc.
4. Organizations/NGOs working on food habits, nutrition, adulterations – Awareness programs for students staying in hostels
5. Urban Region - Smart Cities, Traffic Management, Renewable energy and Solar Systems - Interviews with officers and citizens, social and community leaders, Drives for waste collection and disposal, testing water quality Drives for River and garden Cleaning, etc.
6. Government offices and offices of Local Bodies (Corporation/Municipal Corporation/ Grampanchayat – Interviews with officers and devise mechanism for promotion of Schemes and services for citizens through websites, street plays etc.
7. Pollution control boards – Interviews with officers and arranging drives/awareness programs for Air/Sound/Water pollutions
8. Department of disaster Management – Arranging mock drills
9. Office of Local city bus transportation – Interviews with officers, employees and passengers and suggest solutions with optimised bus routes, frequency, stoppages and fairs
10. Prominent Local social events such as “Sinhasta Kumbhamela”, “Pundharpur Vari” etc. – Crowd and traffic management, surveillance, security, Environmental issues etc.
11. Women education and empowerment – Training programs for house wives and Mahila Udyog and Bachat Gat
12. Community engagement platforms – Study / develop platform for community members to report issues, share ideas and collaborate on local issues.
  - Colleges to try adopting a village or a nearby community through conduction of workshops or awareness drives on topics such as digital literacy, environmental sustainability, mental health, career guidance and planning for local stakeholders

**Savitribai Phule Pune University Second  
Year Bachelor of Computer Applications  
CA – 251 - SEC: Spreadsheet Applications**

<b>Teaching Scheme Practical: 04 Hrs./ Week / Batch</b>	<b>Credits 02</b>	<b>Examination Scheme: Continuous Evaluation: 15 Marks End- Semester: 35 Marks</b>
---	-----------------------	--

**Course Objectives:**

1. To know Excel interface, basic and advanced Data Entry and Formatting
2. To understand Excel Formulas and Functions, Charts
3. To learn to automate tasks with Macros and VBA

**Course Outcomes:**

After successful completion of this course, the learners will be able to -

**CO1:** Navigate and utilize spreadsheet applications effectively for data organization and management

**CO2:** Apply formulas, functions and logical operations to automate tasks.

**CO3:** Analyze and visualize data using charts, pivot tables and conditional formatting

**CO4:** Implement data validation, sorting and filtering for efficient data handling

**CO5:** Develop practical spreadsheet solutions for business scenarios like financial planning, inventory management and project management.

**Guidelines for Instructor's Manual**

The instructor shall prepare instructor's manual consisting of University syllabus, conduction and Assessment guidelines.

**Guidelines for Student Journal**

The student shall perform each laboratory assignment and submit the same in the form of a journal. Journal shall have a Certificate, table of contents, and **handwritten write-up** of each assignment (Title, Objectives, Problem Statement, Program Outputs, software and Hardware requirements, Date of Completion, Assessment grade/marks and signature of the instructor).

**Guidelines for Assessment**

The instructor shall carry out internal evaluation of laboratory assignments of 15 marks throughout the semester. For each lab assignment, the instructor shall assign grade/marks based on parameters with appropriate weightage. Suggested parameters include-timely completion, performance, innovation, efficient codes, code documentation, punctuality and neatness of the write-up etc.

A pair of examiners shall conduct end semester examination of 35 marks in the form of practical examination based on journal assignments. Examiners shall ask questions about journal assignments and / or problem statement provided during practical examination to judge understanding of concepts by the students.

**List of Assignments**

1. Create, Open, Save Spreadsheet, Basic Data Entry and Formatting and conditional formatting, Formula and function, Sorting, importing data from various formats (csv/text)

2. Lookup and Reference Functions - VLOOKUP, HLOOKUP, XLOOKUP
3. INDEX and MATCH (for dynamic lookups) - INDIRECT, OFFSET, CHOOSE
4. Logical Functions - IF, AND, OR, XOR, IFERROR, IFS
5. Text Functions - CONCAT, TEXTJOIN, PROPER, LEFT, RIGHT, MID
6. Date and Time Functions - TODAY, NOW, EOMONTH, NETWORKDAYS
7. Math and Statistical Functions - SUMIF, COUNTIF, AVERAGEIF RANK, LARGE, SMALL

8. Array Formulas and Dynamic Arrays
  - a. Basic example of Arrays using ctrl + shift + enter
  - b. Array with if, len function and mid function formula
  - c. Advanced use of formula with Array.
9. Power Query for Data Cleaning
  - a. Automates data cleaning and transformation.
  - b. Can merge, split, remove duplicates, and reshape data.

#### 10. Histogram, Waterfall, Gantt and Combo Charts

#### 11. Pivot Tables

- a. Creating simple Pivot Tables
- b. Basic and Advanced value field
- c. Classic Pivot Tables
- d. Filtering Pivot Tables
- e. Modifying Pivot Tables
- f. Grouping data in pivot table based on numbers, category and Dates

#### 12. VBA

- a. Creating a Macro, Procedures and Functions in VBA, Variables in VBA
- b. If statement and Select statement - if and Else if, Select case Statement
- c. Loops in VBA - For and Do loop, Exit Loop, Advanced Loop
- d. Mail Functions in VBA - Send automated mail, Merge multiple excel files into one sheet, Split worksheets using VBA filters

#### 13. Micro Projects

- a. Financial Calculation and Budget Planning or
- b. Sales and Inventory Management or
- c. Project and Time Management

Minor Courses offered  
by BOS (Computer Applications)  
to  
any other BOS under FoS&T or any  
faculty except FoS&T  
for  
SEMESTER III and IV only

<b>Savitribai Phule Pune University</b> <b>Minor Course offered by BOS (Computer Applications) to any other BOS under</b> <b>FoS&amp;T or any faculty except FoS&amp;T for</b> <b>SEMESTER III only</b> <b>CA – 241 – MN: Programming with Python</b>		
<b>Teaching Scheme:</b> <b>Theory: 02 Hrs./ Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester: 35 Marks</b>
<b>Course Objectives:</b> <ol style="list-style-type: none"> <li>1. To introduce programming concepts using Python</li> <li>2. To understand various constructs in Python</li> <li>3. To test and execute Python programs.</li> </ol>		
<b>Course Outcomes:</b> After successful completion of this course, the learners will be able to: <b>CO1:</b> Write Python programs to solve the given problem <b>CO2:</b> Utilize the data structures such as lists, dictionaries, tuples and sets. <b>CO3:</b> Use built-in and user defined modules and packages. <b>CO4:</b> Apply operations involving file systems and data handling.		
Course Contents		
Unit I	Introduction to Python	5 Hrs.
1.1 Introduction <ol style="list-style-type: none"> <li>1.1.1. Python identifiers and reserved words</li> <li>1.1.2. Lines and indentation, multi-line statements and Comments</li> <li>1.1.3. Input/output with print and input functions</li> <li>1.1.4. Command line arguments and processing command linear arguments</li> </ol> 1.2 Data Types <ol style="list-style-type: none"> <li>1.2.1 Standard data types -basic, none, Boolean, numbers</li> <li>1.2.2. Data type conversion</li> </ol> 1.3 Operators <ol style="list-style-type: none"> <li>1.3.1 : Basic operators (Arithmetic, comparison, assignment, bitwise, logical)</li> <li>1.3.2 Membership operators (in, not in)</li> <li>1.3.3. Identity operators (is, is not)</li> </ol> 1.4 Control Statement <ol style="list-style-type: none"> <li>1.4.1 Conditional/decision statements (if, if—else, elif,</li> <li>1.4.2. Loop Control Structure (while, Do--while, for)</li> <li>1.4.3 Selection Control Statement (Switch case, Pass, Continue, Break)</li> </ol> 1.5 Basic Object-Oriented Programming Concepts in Python <ol style="list-style-type: none"> <li>1.5.1 Creating classes, instance, objects, accessing members</li> <li>1.5.2 Data hiding (the double underscore prefix)</li> <li>1.5.3 Built-in class attributes</li> </ol>		

	1.5.4 Garbage collection 1.5.5 Constructor 1.6 Applications of Python	
<b>Unit II</b>	<b>Functions and Strings</b>	<b>7 Hrs.</b>
2.1	Introduction to function 2.1.1 Defining a function, calling a function 2.1.2 Types of function (Built-in, function, user-defined function, lambda function /anonymous function, recursive function) 2.1.3 Function arguments 2.1.4 Global and Local variable, Examples 2.1.5 Math Functions 2.1.6 Functional programming tools -filter( ), map( ), and reduce( )	
2.2	Introduction to string 2.2.1 Declaration and String manipulation -Accessing String, String Slices. 2.2.2 Documentation Strings-Single quotes, Double quotes, Triple quotes, Raw String 2.2.3 Python string operators, escape character 2.2.4 String formatting operator 2.2.5 Built-in String functions / Methods	
<b>Unit III</b>	<b>Tuple, Set and Dictionary</b>	<b>8 Hrs.</b>
3.1	Introduction to tuple 3.1.1 Tuple definition, accessing tuple values, update and delete tuple elements 3.1.2 Basic Tuple operations 3.1.3 Tuple -Indexing and slicing 3.1.4 Built in tuple functions 3.1.5 Applications of tuple	
3.2	Introduction to set 3.2.1 Create, update and remove elements from set 3.2.2 Set operations 3.2.3 Set built-in functions 3.2.4 Applications of set	
3.3	Introduction to Dictionary 3.3.1 Creating and accessing values in a dictionary 3.3.2 Updating dictionary, delete dictionary elements 3.3.3 Properties of dictionary keys 3.3.4 Built-in dictionary functions and methods	
<b>Unit IV</b>	<b>Modules and Packages</b>	<b>4 Hrs.</b>
4.1	Introduction to Module	
4.2	Types of Module and Examples 4.2.1 Built_in Module (Math module, Random module, Time module, regular expression)	

4.2.2	User Defined Module (creation and import)	
4.2.3	External Module (Python libraries-NumPy, Pandas, Matplotlib, Seaborn)	
4.3	Introduction to Package	
4.3.1	Importing and creating package	
4.3.2	Example of packages	
<b>Unit V</b>	<b>File Handling, Data Handling using Data Frames</b>	<b>6 Hrs.</b>
5.1	Introduction to file	
5.1.1	Definition	
5.1.2	Types of files (Text, Binary and CSV file)	
5.1.3	File Opening Modes (r, r+, w, w+, a, a+)	
5.1.4	Creating files and Operations on files (open, close, read, write)	
5.2	Data Manipulation	
5.2.1	Creating Data Frame -User define, using csv file	
5.2.2	View Data Frame	
5.2.3	Preprocessing on Data Frame -Null Values, Duplicate values	
5.2.4	Modify Data in Data Frame	
5.2.5	Grouping and Aggregating Data	
5.3	Data Visualization (Histogram, Line chart, Bar chart, Scatter plot )

**Minor Course offered by BOS (Computer Applications) to any other BOS under**  
**FoS&T or any faculty except FoS&T for**  
**SEMESTER III only**  
**CA – 242 - MNP: Lab Course on CA – 241 - MN**

<b>Teaching Scheme:</b> <b>Practical: 04 Hrs./ Week</b> <b>/ Batch</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 15 Marks End-</b> <b>Semester: 35 Marks</b>
--	-----------------------------	--

**Course Objectives:**

1. To introduce programming concepts using Python
2. To understand various constructs in Python
3. To test and execute Python programs.

**Course Outcomes:** After successful completion of this course, the learners will be able to:

**CO1:** Write Python programs to solve the given problem

**CO2:** Utilize the data structures such as lists, dictionaries, tuples and sets.

**CO3:** Use built-in and user defined modules and packages.

**CO4:** Apply operations involving file systems and data handling.

**List of Assignments**

<b>Unit 1</b>	<b>Introduction to Python</b>	<b>12 Hrs.</b>
Assignment on various operator in Python Assignment on Loop and decision control statement Assignment on classes and built in functions		
<b>Unit 2</b>	<b>Strings and Functions</b>	<b>12 Hrs.</b>
Assignment on string operators and built-in string functions Assignment on user defined functions and math functions		
<b>Unit 3</b>	<b>Tuple, Set and Dictionary</b>	<b>12 Hrs.</b>
Assignment on Tuple Assignment on Sets Assignment on create dictionary Assignment on access and manipulates the elements from dictionary.		
<b>Unit 4</b>	<b>Modules and Packages</b>	<b>12 Hrs.</b>
Assignment on importing, Creating and exploring modules Assignment on Math module, Random module, Time module, Regular expression module. Assignment on importing package and creating package		
<b>Unit 5</b>	<b>File Handling, Data Handling using (3) Data Frames (3)</b>	<b>12 Hrs.</b>
Assignment on Creating files and Operations on file Assignment on Data Frame creation and preprocessing on data Assignment on Data Visualization		

**Savitribai Phule Pune University**  
**Minor Course offered by BOS (Computer Applications) to any other BOS under**  
**FoS&T or any faculty except FoS&T for**  
**SEMESTER IV only**  
**CA - 291- MN: Introduction of Artificial Intelligence and Machine Learning**

<b>Teaching Scheme:</b> <b>Theory: 02 Hrs./ Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 15 Marks End-</b> <b>Semester: 35 Marks</b>
---	-----------------------------	--

**Course Objectives:**

1. To learn the core concepts of AI, evolution and different paradigms of AI
2. To understand expert systems and how they utilize knowledge bases and inference engines to solve problems.
3. To study the concepts in machine learning, including supervised, unsupervised, and reinforcement learning.
4. To know the basics of deep learning frameworks.

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** Describe basic concepts in AI

**CO2:** Compare different search algorithms used in AI

**CO3:** Demonstrate understanding of knowledge representation and logic

**CO4:** apply key machine learning concepts such as supervised, unsupervised, and reinforcement learning.

**CO5:** Develop the ability to use machine learning algorithms such as linear regression, logistic regression, decision trees.

**Course Contents**

<b>Unit I</b>	<b>Introduction to Artificial Intelligence and Problem Space</b>	<b>07 Hrs.</b>
1.1	Introduction	
1.2	Comparison of AI, Machine Learning, Deep Learning	
1.3	AI Techniques and Application of AI	
1.4	Agents	
	1.4.1 definition and types of agents	
	1.4.2 Agent and Environments	
	1.4.3 Structure of Agents.	
1.5	Defining problem as a State Space Search	
1.6	Production System, Problem Characteristics	
1.7	Problem Space	
	1.7.1 Water Jug Problem	
	1.7.2 Missionary Cannibal Problem	
	1.7.3 Block Words Problem	
	1.7.4 Monkey and Banana Problem	
<b>Unit II</b>	<b>Search Algorithms</b>	<b>08 Hrs.</b>

2.1	Search Algorithms	
2.2	Uninformed Search Algorithm / Blind Search Techniques	
2.2.1	Breadth-First Search	
2.2.2	Depth-First Search	
2.3	Informed Search Techniques	
2.3.1	Generate and Test	
2.3.2	Simple Hill Climbing	
2.3.3	Best First Search	
2.3.4	Constraint Satisfaction	
2.3.5	Mean End Analysis	
2.3.6	A* and AO*	
<b>Unit III</b>	<b>Knowledge Representation and Reasoning</b>	<b>08 Hrs.</b>
3.1	Definition of Knowledge	
3.2	Types of Knowledge	
3.2.1	Procedural Knowledge	
3.2.2	Declarative Knowledge	
3.3	Approaches to Knowledge Representations	
3.4	Propositional and Predicate Logic	
<b>Unit IV</b>	<b>Introduction to Machine Learning</b>	<b>07 Hrs.</b>
4.1	Introduction to Machine Learning	
4.2	Key concept of Machine Learning (Data, Model, Training, Labels, Features)	
4.3	Types of Machine Learning (Supervised, Unsupervised and Reinforcement Learning)	
4.4	Deep Learning: Natural Language Processing, Computer Vision, Speech Recognition, Robotics, Generative AI.	
4.5	Applications	
<b>Books</b>

---	-----------------------------	--

**Course Objectives:**

1. To learn to use algorithms in AI and machine learning
2. To understand various machine learning techniques, libraries and tools

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** Apply the suitable AI algorithms to solve a given problem

**CO2:** preprocess real-world data, including handling missing values, outliers, and scaling

**CO3:** Use appropriate machine-learning libraries and tools

**CO4:** solve problems using machine learning techniques.

**List of Assignments**

<b>Assignment 1</b>	<b>Artificial Intelligence and Problem Space</b>
<ul style="list-style-type: none"> <li>• Water Jug Problem</li> <li>• Missionary Cannibal Problem</li> </ul>	
<b>Assignment 2</b>	<b>Problem Space</b>
<ul style="list-style-type: none"> <li>• Block Words Problem</li> <li>• Monkey and Banana Problem</li> </ul>	
<b>Assignment 3</b>	<b>Search Algorithms</b>
<ul style="list-style-type: none"> <li>• Breadth-First Search</li> <li>• Depth-First Search</li> </ul>	
<b>Assignment 4</b>	<b>Search Algorithms</b>
<ul style="list-style-type: none"> <li>• Constraint Satisfaction</li> </ul>	
<b>Assignment 5</b>	<b>Generate and Test</b>
<ul style="list-style-type: none"> <li>• Simple Hill Climbing</li> <li>• Best First Search</li> </ul>	
<b>Assignment 6</b>	<b>Testing and Analysis</b>
<ul style="list-style-type: none"> <li>• Mean End Analysis</li> <li>• A* and AO*</li> </ul>	
<b>Assignment 7</b>	<b>Knowledge Representation</b>
<ul style="list-style-type: none"> <li>• Procedural Knowledge</li> <li>• Declarative Knowledge</li> </ul>	

<b>Assignment 8</b>	<b>Reasoning</b>
<ul style="list-style-type: none"> <li>• Propositional Logic</li> <li>• Predicate Logic</li> </ul>	
<b>Assignment 9</b>	<b>Machine Learning Libraries</b>
<ul style="list-style-type: none"> <li>• Scikit-learn, pandas, NumPy</li> <li>• Jupiter Notebook basics</li> <li>• Introduction to Google Collab</li> </ul>	
<b>Assignment 10</b>	<b>Data Cleaning</b>
<ul style="list-style-type: none"> <li>• User defined data frame creation</li> <li>• Missing data, noise removal</li> </ul>	
<b>Assignment 11</b>	<b>Data Visualization Techniques</b>
<ul style="list-style-type: none"> <li>• Data visualization techniques using Matplotlib and Seaborn</li> </ul>	
<b>Assignment 12</b>	<b>GenAI</b>
<ul style="list-style-type: none"> <li>• Use GenAI to acquire the knowledge in structured format like if then else rule.</li> </ul>

**for SEMESTER IV only**

**OE – 251 – CA: Software Tools for Office Administration**

<b>Teaching Scheme:</b> <b>Practical: 04 Hrs./Week/ Batch</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme: Continuous</b> <b>Evaluation: 15 Marks End- Semester: 35 Marks</b>
--	-----------------------------	--

**Course Objectives:**

1. To be familiarize with office automation tools for efficient document management, data processing, and communication.
2. To understand tools for word processing, spreadsheets, presentations, and data collection to enhance office productivity.
3. To study tools for collaboration and management of files using cloud-based platforms like Google Drive and OneDrive securely.
4. To learn email etiquette, calendar scheduling, and cyber security for professional office administration.

**Course Outcomes:** After successful completion of this course, the learners will be able to

**CO1:** Apply word processing techniques to create, format, and manage professional documents

**CO2:** Use spreadsheet tools for data entry, analysis, visualization, and decision-making.

**CO3:** Design and deliver interactive professional presentations using animations and multimedia integration.

**CO4:** Create and analyze Google Forms for data collection, surveys, and automated feedback management.

**CO5:** Implement email and cloud-based collaboration tools to enhance office communication, scheduling, and document security.

**List of Assignments**

<b>Document Creation and Communication Tools</b>	<b>15 Hrs.</b>
--	----------------

**Assignment 1: Understanding CV Formatting and Design:** Create a Curriculum Vitae (CV) using Google Docs or MS Word. Apply proper formatting with headings, bold text, and bullet points. Upload the document to Google Drive and share it with your friends as viewers.

**Assignment 2: Automating Personalized Communication with Mail Merge:** Use Mail Merge in MS Word to send personalized invitation letters. Prepare an Excel sheet with at least 5 names and email addresses. Merge the data into a formal letter template. Save the final document as PDF, upload it to Google Drive

**Assignment 3: Writing Formal Emails for Professional Communication:** Compose a formal email to your professor requesting a meeting using Gmail or Outlook. Attach a Word file as an agenda.

<b>Spreadsheets for Data Management and Analysis</b>	<b>15 Hrs.</b>
<p><b>Assignment 4: Data Visualization Using Charts and Conditional Formatting</b> Analyze sales data using charts in MS Excel or Google Sheets. Enter sample sales data (Product, Sales, Revenue, etc.). Create a Bar Chart and Pie Chart to visualize the data. Apply conditional formatting to highlight low sales.</p> <p><b>Assignment 5: Financial Tracking with Google Sheets</b> Create a monthly expense tracker in Google Sheets. Include columns: Date, Category, Amount, and Total. Use the SUM formula to calculate total expenses. Format the sheet properly.</p>	
<b>Presentations and Multimedia Integration</b>	<b>15 Hrs.</b>
<p><b>Assignment 6: Enhancing Presentations with Multimedia and Effects</b> Design a 5-slide presentation on "Future of Office Automation" using Google Slides or MS PowerPoint. Include images, animations, and transitions. Add a video or audio clip to enhance the content.</p>	
<b>Online Collaboration and Cloud-Based Tools</b>	<b>15 Hrs.</b>
<p><b>Assignment 7: Creating and Analyzing Surveys Using Google Forms</b> Create a Google Form to collect event feedback. Include multiple-choice, rating scale, and short-answer questions. Collect at least 10 responses and analyze them in Google Sheets.</p> <p><b>Assignment 8: Efficient Meeting Scheduling with Google Calendar</b> Schedule a team meeting using Google Calendar. Add title, date, time, and agenda. Invite at least 3 participants and set a reminder.</p> <p><b>Assignment 9: File Management and Collaboration in Google Drive</b> Organize and share files in Google Drive. Create a folder named "Office Automation Project" and upload at least 3 different files (Doc, Sheet, Slide)</p>
